Points of difference	<p>Clean location</p> <p>well maintained good signs</p> <p>locals using bins</p>	<p>Hot spot</p> <p>area in need of repairs</p> <p>broken glass and litter trapped in location</p>	
Opportunities for improvements	<p>Clean location</p> <p>consider possibility of adding recycling bins</p>	<p>Hot spot</p> <p>look at improving bins</p> <p>help prepare for busy holiday times</p>	
Key actions for litter prevention	<p>Do a project targeting small parts of the esplanade area. Link smaller projects into the longer-term beautification plans council has for the area. Need to contact the planners to get litter prevention included at the start of the beautification plans to make sure bins are where people need them. Perhaps get the planners involved in how people are likely to use the area and need bins. We could even trial different types of bins and signs (multi-lingual combinations) Talk to enforcement staff as well - see if they could get involved with educating users.</p> <p>Get sports clubs, traders, council, env gps involved in coordinated clean up, education. Need new signage.</p>
