To Whom It May Concern

I am a Balmain East resident living in the area for over 10 years. The increasing ship activity since the construction of white bay and seen and incredible decline in the air quality of our Harbourside suburb!

I often find black soot on my clothes on the line and my asthma has gotten worse over the last couple of years.

I support the cruise industry as it injects billions into our economy but we. Red to wake up and install ship to shore power! Just about every other country in the world recognise the importance of ship to shore power and supply it. It is a disgrace that NSW keep on ignoring the issues and continue to allow the people of Balmain to inhale toxic fumes!!!
