

# WasteLocate

## Tyre outlet optional QR2id Location Plates

**WasteLocate is a new online system developed by Amtac for the NSW Environment Protection Authority (EPA) to monitor the transport and management of waste tyres and asbestos within NSW.**

Tyre waste generators, transporters and receiving facilities must use *WasteLocate* to report the transport of waste tyres exceeding 20 tyres or 200kg to the EPA. *WasteLocate* uses QR2id codes, which are two dimensional barcodes similar to those used on advertising brochures and product packaging. These can be scanned with a smart phone or tablet computer running a QR Reader App.

These QR2id codes appear on plates installed at waste and recycling facilities so transporters can report the delivery of these wastes to the EPA by scanning the plate on arrival. QR2id plates are also available for tyre outlets, to facilitate after hours collections and setting up ongoing consignments. Transporters will be able to select the consignments you have assigned to them by simply scanning the QR2id plate on collection. Creating a consignment and assigning it to a transporter using *WasteLocate* is a legal requirement, but acquiring a plate for your store or outlet for enhanced efficiency is **optional**.

If you have a tyre store or outlet in NSW that generates waste tyres you **must**:

- 1. register as a waste tyre consignor at [WasteLocate.com/register](http://WasteLocate.com/register)**
- 2. add any additional locations or tyre outlets you operate, using the same ABN**

### **Optional:**

- 3. order QR2id plates at [WasteLocate.com/order-plates](http://WasteLocate.com/order-plates) for enhanced efficiency.**

Assistance is available if you have multiple outlets requiring registration by calling Amtac on **1800 420 380**.

### **Ordering QR2id plates: ▪**

#### **QR2id Plate Only • \$45 +GST**

1.2mm exterior grade anodised aluminium, CO<sub>2</sub> laser-marked , unique QR2id Code, six fixing points

#### ▪ **QR2id Plate on Heavy Duty Base • \$150 +GST**

Heavy duty machined aluminium base, graffiti-resistant powder coat finish, concealed mounting, security Torx screws

#### ▪ **Pole Mount Bracket Only • \$60 +GST**

Powder coat finish, attaches to heavy duty base, suits 60mm OD galvanized pole, simple installation

Prices **exclude** freight and handling, which is calculated on the basis of quantities and total weight.
