

8/7/18

To the ministers, councillors and related bureaucrats,  
RE: Logging of forest at Corronna Lake, NSW.

For environmental, economic, social and ethical reasons I deplore you to immediately investigate the legislative breaches that Forestry Corporation has made in regard to logging in NSW and Corronna Lake in particular. I strongly recommend a site visit as the proposed logging will significantly reduce the tourist value of this highly popular picnic and recreational site.

The value of forests and the biodiversity and ecological values have been scientifically proven without question. This is a sorry state of affairs and sufficient community consultation has clearly not been sought.

I look forward to your response to this urgent matter.

Sincerely,

EVA COLEK

 ACT
