

A letter in representation of all forests, especially conuna state forest, as the most present case to date,

It would be a very distasteful decision indeed to give up on the Stewardship carried out by aboriginals long before our domestication and 'growth' mindsets unwittingly took over.

Let YOUR spirit sore and keep things the way they are, ie., stumps in dirt, for you may not foresee the long term devastation your words ensue.

Lots of Love, JOEL From
