

To whom it may concern,
I am writing in desperation that you please reconsider the logging of Corunna State Forest.

This forest brings me much joy + my ~~child~~ ^{daughter} much joy too. I only hope that she too will be able to share the forest & respect for nature with her children in the future.

I hope that she can live in a country that respects the ultimate mother of us all, our planet earth.

My daughter was born at the base of Gulager, her blood is connected to this land. If the government was not to take a stance against the destruction of our beautiful forest, then we would be living in a country that we are not proud of. Please save the forest for our children & their futures.

Warmly,

Josie
