To whom it may concern,

I am writing to explain my concerns for the future of the Conna Lake area, and its forest. As a visitor, I have fallen in love with the natural beauty of these forests, the same way many others that venture out to Norooma to indulge on these beautiful native lands have. I believe that it is essential that WE end logging and put an end to the future logging project, in order to ensure the continuation of tourism, and jobs in this area.

Not only is this an issue regarding the Norooma area, but it's a global issue that needs to be stopped. By canceling the logging project we can make a small step in the right direction to solving one of the common issues we're all concerned with...

**SAVING OUR PLANET!!!** I hope that you take these concerns into account.

Yours Sincerely,
