Licence - 563

Licence Details	
Number:	563
Anniversary Date:	20-July

Licensee
BULGA COAL MANAGEMENT PTY LIMITED
PRIVATE MAIL BAG 8
SINGLETON NSW 2330

Premises
BULGA COAL COMPLEX
BROKE ROAD
SINGLETON NSW 2330

Scheduled Activity
Coal works
Crushing, grinding or separating
Mining for coal

Fee Based Activity	Scale
Coal works	> 5000000 T annual handing capacity
Crushing, grinding or separating	> 100000-500000 T annual processing capacity
Mining for coal	> 5000000 T annual production capacity

Licence - 563

## Information about this licence

### Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

### Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

### Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

### Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

### Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

### Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

# Environment Protection Licence

Licence - 563

The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

### Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

### Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

### This licence is issued to:

BULGA COAL MANAGEMENT PTY LIMITED
PRIVATE MAIL BAG 8
SINGLETON NSW 2330

subject to the conditions which follow.

# Environment Protection Licence

Licence - 563

## 1 Administrative Conditions

### A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity	Fee Based Activity	Scale
Coal works	Coal works	> 5000000 T annual handing capacity
Crushing, grinding or separating	Crushing, grinding or separating	> 100000 - 500000 T annual processing capacity
Mining for coal	Mining for coal	> 5000000 T annual production capacity

Note: In relation to this licence, the licensee must comply with:

- a) the activity scale limits imposed by this licence;
- b) the activity scale limits which apply for the reporting period specified in this licence; and
- c) the activity scale limits imposed by other legal instruments, such as approvals currently in force under the *Environmental Planning and Assessment Act 1979*.

### A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

Licence - 563

PREMISES AS MARKED AND SHOWN AS "EPL563 PREMISES BOUNDARY AREA" ON THE PLAN TITLED "BULGA COAL COMPLEX EPL 563 PREMISES BOUNDARY" PREPARED BY NATHAN WILLIAMS REGISTERED SURVEYOR, DATED 24 NOVEMBER 2023 (EPA REF. DOC24/21697) AND AS IDENTIFIED IN THE SHAPEFILE PROVIDED TO THE EPA WITH THE LICENCE VARIATION RECEIVED(EPA REF. DOC24/21697-1), WITH UNDERGROUND MINING OF WHYBROW SEAM AND BLAKEFIELD SEAM AS MARKED AND SHOWN AS "WHYBROW SEAM WORKINGS" AND "BLAKEFIELD SEAM WORKINGS" ON THE PLAN TITLED "BULGA COAL FIGURE 3. EPL563 UNDERGROUND MINING ACTIVITIES", DATED 19 JANUARY 2018 (EPA REF. DOC18/335117-04).

### A3 Other activities

A3.1 This licence applies to all other activities carried on at the premises, including:

Ancillary Activity
Electricity Generation from Gas
Sewage Treatment Systems

### A4 Information supplied to the EPA

A4.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

- a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

A4.2 Any other document and/or management plan is not to be taken as part of the documentation in condition A4.1, other than those documents and/or management plans specifically referenced in this licence.

## 2 Discharges to Air and Water and Applications to Land

### P1 Location of monitoring/discharge points and areas

P1.1 The following points referred to in the table below are identified in this licence for the purposes of monitoring and/or the setting of limits for the emission of pollutants to the air from the point.

31	Water quality monitoring	Ambient water quality monitoring in Northern Drainage Line at co-ordinates 318359 6383270 (Easting, Northing) identified as NDL1 on Figure 2.
32	Water quality monitoring	Ambient water quality monitoring in Nine Mile Creek at co-ordinates 324127 6381269 (Easting, Northing) identified as NCM1 on Figure 2.
33	Water quality monitoring	Ambient water quality monitoring in Southern drainage line at co-ordinates 319361 6378372 (Easting, Northing) identified as SDL1 on Figure 2.

P1.4 The following points referred to in the table below are identified in this licence for the purposes of weather and/or noise monitoring and/or setting limits for the emission of noise from the premises.

*Noise/Weather*

EPA identi- fication no.	Type of monitoring point	Location description
5	Air blast overpressure & ground vibration peak particle velocity monitoring	Blast Monitor "Dawtre" at coordinates 317221 6381145 (Easting Northing) identified as EPA Point 5 on Figure 2.
6	Air blast overpressure & ground vibration peak particle velocity monitoring	Blast monitor "Hedley" at coordinates 324830 6388160 (Easting Northing) identified as EPA Point 6 on Figure 2.

# Environment Protection Licence

Licence - 563

7	Air blast overpressure & ground vibration peak particle velocity monitoring	Blast monitor "Bulga" at coordinates 315110 6384567 (Easting Northing) identified as EPA Point 7 on Figure 2.
8	Air blast overpressure & ground vibration peak particle velocity monitoring	Blast monitor "Charlton" at coordinates 320968 6377640 (Easting Northing) identified as EPA Point 8 on Figure 2.
20	Meteorological Station – to determine meteorological conditions for noise monitoring	Meteorological Station at co-ordinates 321077, 6379162 (Easting, Northing) identified as "Flares Meteorological Station" on Figure 2.
21	Meteorological Station – to determine meteorological conditions for noise monitoring	Meteorological Station at co-ordinates 320880, 6383665 (Easting, Northing) identified as "Complex Meteorological Station" on Figure 2.
23	Meteorological Station – to determine meteorological conditions for noise monitoring	Meteorological Station at co-ordinates 321376 6380454 (Easting, Northing) identified as "Southern Extension Met Station" on Figure 2.

P1.5 For the purpose of conditions P1.1, P1.3 and P1.4, "Figure 2" refers to the plan titled "Bulga Coal Complex - Figure 2. EPL 563 Premises Boundary and Monitoring Points" dated 22/11/2023 (EPA ref. DOC24/21697).

## 3 Limit Conditions

### L1 Pollution of waters

- L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.
- L2 Concentration limits
  - L2.1 For each monitoring/discharge point or utilisation area specified in the table/s below (by a point number), the concentration of a pollutant discharged at that point, or applied to that area, must not exceed the concentration limits specified for that pollutant in the table.
  - L2.2 Where a pH quality limit is specified in the table, the specified percentage of samples must be within the specified ranges.
  - L2.3 To avoid any doubt, this condition does not authorise the pollution of waters by any pollutant other than those specified in the table/s.
  - L2.4 Water and/or Land Concentration Limits

# Environment Protection Licence

Licence - 563

## POINT 11

Pollutant	Units of Measure	50 percentile concentration limit	90 percentile concentration limit	3DGM concentration limit	100 percentile concentration limit
pH	pH				6.5-9.5
Total suspended solids	milligrams per litre				120

### L3 Volume and mass limits

L3.1 For each discharge point or utilisation area specified below (by a point number), the volume/mass of:

- a) liquids discharged to water; or;
- b) solids or liquids applied to the area;

must not exceed the volume/mass limit specified for that discharge point or area.

Point	Unit of Measure	Volume/Mass Limit
11	megalitres per day	500

### L4 Waste

L4.1 The licensee must not cause, permit or allow any waste to be received at the premises, except the wastes expressly referred to in the column titled “Waste” and meeting the definition, if any, in the column titled “Description” in the table below.

Any waste received at the premises must only be used for the activities referred to in relation to that waste in the column titled “Activity” in the table below.

Any waste received at the premises is subject to those limits or conditions, if any, referred to in relation to that waste contained in the column titled “Other Limits” in the table below.

This condition does not limit any other conditions in this licence.

Code	Waste	Description	Activity	Other Limits
NA	Garden waste	Pasteurised garden organics for the purpose of rehabilitation	As specified in each particular resource recovery exemption	The Licensee must comply with the Pasteurised Garden Organics Exemption 2016
NA	Gypsum plaster board	Gypsum plasterboard for the purpose of rehabilitation	As specified in each particular resource recovery exemption	The Licensee must comply with the Recovered Plasterboard Exemption 2014
NA	Compost (The compost	Compost for the	As specified in each	The Licensee

# Environment Protection Licence

Licence - 563

exemption 2016-NSW EPA)	purpose of rehabilitation	particular resource recovery exemption	must comply with the Compost Exemption 2016.
----------------------------	---------------------------	---	--

- L4.2 The Licensee is authorised to receive saline mine water transfers from Mt Thorley Coal Mine for storage and use in activities authorised by this Licence.
- L4.3 The Licensee is authorised to transfer saline mine water to Mt Thorley Coal Mine.
- L4.4 Waste generated on the premises must not be disposed of on the premises unless authorised by a condition of this Licence.

## L5 Blasting

- L5.1 The airblast overpressure level from blasting operations in or on the premises must not exceed 115 dB (Lin Peak) for more than 5% of the total number of blasts during each reporting period; at either monitoring point 5,6,7 or 8 in Condition P1.4.
- L5.2 The airblast overpressure level from blasting operations in or on the premises must not exceed 120 dB (Lin Peak) at any time; at either monitoring pint 5,6,7 or 8 in Condition P1.4.
- L5.3 The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed: 5 mm/second for more than 5% of the total number of blasts during each reporting period; at either monitoring pint 5,6,7 or 8 in Condition P1.4.
- L5.4 The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed 10 mm/second at any time; at either monitoring pint 5,6,7 or 8 in Condition P1.4.
- L5.5 Offensive blast fume must not be emitted from the premises.

### Definition:

*Offensive blast fume means post-blast gases from the detonation of explosives at the premises that by reason of their nature, duration, character or quality, or the time at which they are emitted, or any other circumstances:*

- 1. are harmful to (or likely to be harmful to) a person that is outside the premises from which it is emitted, or*
- 2. interferes unreasonably with (or is likely to interfere unreasonably with) the comfort or repose of a person who is outside the premises from which it is emitted.*

## L6 Other limit conditions

# Environment Protection Licence

Licence - 563

- L6.1 Flares must be operated by the licensee such that there is no visible emission other than for a total period of no more than 5 minutes in any 2 hours, except for heat haze.

Note: The operation of the flares and gas engines are required to comply with the provisions and limits contained with the *Protection of the Environment Operations (Clean Air) Regulation 2010*.

## 4 Operating Conditions

### O1 Activities must be carried out in a competent manner

- O1.1 Licensed activities must be carried out in a competent manner.

This includes:

- a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

### O2 Maintenance of plant and equipment

- O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:

- a) must be maintained in a proper and efficient condition; and
- b) must be operated in a proper and efficient manner.

- O2.2 The licensee is responsible for the correct operation of the sewage treatment system on the premises.

- O2.3 Correct operation involves regular supervision and system maintenance. The licensee must be aware of the system management requirements and must ensure that the necessary service contracts are in place.

- O2.4 The sewage treatment system must be serviced by a suitably qualified and experienced wastewater technician at least once in each quarterly period and a minimum of four times per year.

- O2.5 The licensee must record each inspection and any actions required or recommended by the technician including all results of tests performed on the sewage treatment system by the technician as required in Condition O2.4.

- O2.6 The licensee must prepare a sewage treatment system maintenance program. The program must include:
- a) Certification from the system provider that the sewage treatment system is operating within its capacity;
  - b) Date, time and results of all routine maintenance procedures undertaken to the sewage treatment system; and
  - c) Provide written records of each quarterly inspection.

### O3 Dust

- O3.1 The premises must be maintained in a condition which minimises or prevents the emission of dust from the premises.

- O3.2 All trafficable areas, coal storage areas and vehicle manoeuvring areas in or on the premises must be

# Environment Protection Licence

Licence - 563

maintained, at all times, in a condition that will minimise the generation, or emission from the premises, of wind-blown or traffic generated dust.

- O3.3 All operations and activities occurring at the premises must be carried out in a manner that will minimise the emission of dust from the premises.

## O4 Emergency response

Note: The licensee must maintain, and implement as necessary, a current Pollution Incident Response Management Plan (PIRMP) for the premises. The licensee must keep the incident response plan on the premises at all times. The incident response plan must document systems and procedures to deal with all types of incidents (e.g. spills, explosions or fire) that may occur at the premises or that may be associated with activities that occur at the premises and which are likely to cause harm to the environment. The licensee must develop a Pollution Incident Response Management Plan in accordance with the requirements in Part 5.7A of the Protection of the Environment Operations (POEO) Act 1997 and POEO regulations.

## O5 Waste management

### Heavy Plant-Tyre Disposal

- O5.1 The Licensee is authorised to dispose of heavy Plant-tyre waste generated on the premises, in the pit. The Licensee must:

- a) ensure that heavy Plant waste tyres are re-used on the premises as much as practical;
- b) ensure that any surplus heavy Plant waste tyres can be emplaced by being spread out on the pit-floor and buried as deep as practical, but, covered by at least 20m of inert material beneath any final rehabilitated surface;
- c) place heavy Plant waste tyres at least 10m away from coarse reject material or tailings emplacement areas;
- d) not place any heavy Plant waste tyres near heated material;
- e) not place any heavy Plant waste tyres in an area likely to leach to any water-coarse;
- f) tyres must not be stacked greater than 2 tyres in height.

## O6 Other operating conditions

- O6.1 All above-ground tanks containing material that is likely to cause environmental harm must be bunded or have an alternative spill containment system in place.

## 5 Monitoring and Recording Conditions

### M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.

# Environment Protection Licence

Licence - 563

- M1.2 All records required to be kept by this licence must be:
- a) in a legible form, or in a form that can readily be reduced to a legible form;
  - b) kept for at least 4 years after the monitoring or event to which they relate took place; and
  - c) produced in a legible form to any authorised officer of the EPA who asks to see them.
- M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
- a) the date(s) on which the sample was taken;
  - b) the time(s) at which the sample was collected;
  - c) the point at which the sample was taken; and
  - d) the name of the person who collected the sample.

## M2 Requirement to monitor concentration of pollutants discharged

M2.1 For each monitoring/discharge point or utilisation area specified below (by a point number), the licensee must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The licensee must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

### M2.2 Air Monitoring Requirements

**POINT 9,10**

Pollutant	Units of measure	Frequency	Sampling Method
PM10	micrograms per cubic metre	Continuous	Special Method 1

Note: For the purposes of condition M2.1, Special Method 1 requires the licensee to undertaken the monitoring of PM10 concentrations strictly in accordance with the manufacturer's operating manual supplied with the continuous monitoring equipment and titled "E-BAM Particulate Monitor Operation Manual E-BAM-9800 Rev M" by Met One Instruments, Inc. (EPA Reference DOC19/970477).

### M2.3 Water and/ or Land Monitoring Requirements

**POINT 11**

Pollutant	Units of measure	Frequency	Sampling Method
Conductivity	microsiemens per centimetre	Continuous during discharge	A probe designed to measure the range 0 to 10,000 uS/cm
pH	pH	Daily during any discharge	Grab sample
Total suspended solids	milligrams per litre	Daily during any discharge	Grab sample

# Environment Protection Licence

Licence - 563

Turbidity	nephelometric turbidity units	Continuous during discharge	In line instrumentation
-----------	-------------------------------	-----------------------------	-------------------------

**POINT 12,13**

Pollutant	Units of measure	Frequency	Sampling Method
Faecal Coliforms	colony forming units per 100 millilitres	Quarterly	Grab sample
pH	pH	Quarterly	Grab sample

**POINT 24,25,26,27,28,29,30,31,32,33**

Pollutant	Units of measure	Frequency	Sampling Method
Electrical conductivity	microsiemens per centimetre	Monthly	Grab sample
pH	pH	Monthly	Grab sample
Total suspended solids	milligrams per litre	Monthly	Grab sample

Note: The requirement for turbidity monitoring at point 11 will be reviewed by the EPA after review of the data obtained during HRSTS discharge events.

**M3 Testing methods - concentration limits**

- M3.1 Monitoring for the concentration of a pollutant emitted to the air required to be conducted by this licence must be done in accordance with:
- a) any methodology which is required by or under the Act to be used for the testing of the concentration of the pollutant; or
  - b) if no such requirement is imposed by or under the Act, any methodology which a condition of this licence requires to be used for that testing; or
  - c) if no such requirement is imposed by or under the Act or by a condition of this licence, any methodology approved in writing by the EPA for the purposes of that testing prior to the testing taking place.
- M3.2 Subject to any express provision to the contrary in this licence, monitoring for the concentration of a pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

Note: The *Protection of the Environment Operations (Clean Air) Regulation 2022* requires testing for certain purposes to be conducted in accordance with test methods contained in the publication "Approved Methods for the Sampling and Analysis of Air Pollutants in NSW".

**M4 Weather monitoring**

- M4.1 At the point(s) identified below, the licensee must monitor (by sampling and obtaining results by analysis) the parameters specified in Column 1 of the table below, using the corresponding sampling method, units of

# Environment Protection Licence

Licence - 563

measure, averaging period and sampling frequency, specified opposite in the Columns 2, 3, 4 and 5 respectively.

**POINT 20,21**

Parameter	Sampling method	Units of measure	Averaging period	Frequency
Temperature at 2 metres	AM-4	Celsius	10 minutes	Continuous
Temperature at 10 metres	AM-4	Celsius	10 minutes	Continuous
Wind Speed at 10 metres	AM-2 & AM-4	metres per second	10 minutes	Continuous
Wind Direction at 10 metres	AM-2 & AM-4	Degrees	10 minutes	Continuous

**POINT 20,21,23**

Parameter	Sampling method	Units of measure	Averaging period	Frequency
Relative humidity	AM-4	percent humidity	10 minutes	Continuous
Sigma theta	Special Method 2	Degrees	10 minutes	Continuous
Rainfall	AM-4	millimetres per hour	10 minutes	Continuous

**POINT 23**

Parameter	Sampling method	Units of measure	Averaging period	Frequency
Wind Direction at 30 metres	AM-2 & AM-4	Degrees	10 minutes	Continuous
Temperature at 30 metres	AM-4	Celsius	10 minutes	Continuous
Wind Speed at 30 metres	AM-2 & AM-4	metres per second	10 minutes	Continuous

M4.2 Special Method 2 means sampling method in accordance with Fact Sheet D of the Noise Policy for Industry 2017.

**M5 Recording of pollution complaints**

M5.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

M5.2 The record must include details of the following:

- a) the date and time of the complaint;
- b) the method by which the complaint was made;
- c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- d) the nature of the complaint;
- e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and

# Environment Protection Licence

Licence - 563

f) if no action was taken by the licensee, the reasons why no action was taken.

M5.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M5.4 The record must be produced to any authorised officer of the EPA who asks to see them.

## M6 Telephone complaints line

M6.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M6.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M6.3 The preceding two conditions do not apply until 3 months after: the date of the issue of this licence.

## M7 Requirement to monitor volume or mass

M7.1 For each discharge point or utilisation area specified below, the licensee must monitor:

- a) the volume of liquids discharged to water or applied to the area;
- b) the mass of solids applied to the area;
- c) the mass of pollutants emitted to the air;

at the frequency and using the method and units of measure, specified below.

### POINT 11

Frequency	Unit of Measure	Sampling Method
Continuous during discharge	megalitres per day	Electronic level sensor and continuous logger

## M8 Blasting

M8.1 To determine compliance with conditions L5.1, L5.2, L5.3 and L5.4:

- a) Airblast overpressure and ground vibration levels must be measured and electronically recorded for monitoring points 5, 6, 7 and 8 for the parameters specified in Column 1 of the table below; and
- b) The licensee must use the units of measure, sampling method, and sample at the frequency specified opposite in the other columns.

Parameter	Units of Measure	Frequency	Sampling Method
Airblast Overpressure	Decibels (Linear Peak)	All blasts	Australian Standard AS 2187.2-2006
Ground Vibration Peak Particle Velocity	millimetres/second	All blasts	Australian Standard AS 2187.2-2006

# Environment Protection Licence

Licence - 563

## M9 Other monitoring and recording conditions

### HRSTS Monitoring

- M9.1 The Licensee must continuously operate and maintain communication equipment which makes the conductivity and flow measurements, taken at Point 11 available to the "Service Coordinator" within one hour of those measurements being taken and makes them available in the format specified in the report titled "Hunter River Salinity Trading Scheme Discharge Point Telemetry Specification - Rev V1.0 Released 4 October 2018" as published by WaterNSW.
- M9.2 The licensee must ensure that all monitoring data is within a margin of error of 5% for conductivity measurements and 10% for discharge flow measurement.
- M9.3 The licensee must mark monitoring Point 11 with a sign which clearly indicates the name of the licensee, whether the monitoring point is up or down stream of the discharge point and that it is a monitoring point for the Hunter River Salinity Trading Scheme.

### Requirement to Monitor Particulate Matter

- M9.4 The licensee must record the average PM10 concentration at Monitoring Points 9 and 10 at intervals of 10 minutes. This data must be made available upon request by any Authorised Officer of the EPA who asks to see them.

## 6 Reporting Conditions

### R1 Annual return documents

- R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:
1. a Statement of Compliance,
  2. a Monitoring and Complaints Summary,
  3. a Statement of Compliance - Licence Conditions,
  4. a Statement of Compliance - Load based Fee,
  5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan,
  6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and
  7. a Statement of Compliance - Environmental Management Systems and Practices.

At the end of each reporting period, the EPA will provide to the licensee notification that the Annual Return is due.

- R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

- R1.3 Where this licence is transferred from the licensee to a new licensee:

# Environment Protection Licence

Licence - 563

- a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

- R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:
  - a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
  - b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.
- R1.5 The Annual Return for the reporting period must be supplied to the EPA via eConnect *EPA* or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').
- R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.
- R1.7 Within the Annual Return, the Statements of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:
  - a) the licence holder; or
  - b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

## R2 Notification of environmental harm

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

- R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.
- R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which they became aware of the incident.

## R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
  - a) where this licence applies to premises, an event has occurred at the premises; or
  - b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,
 and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.

# Environment Protection Licence

Licence - 563

- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.
- R3.3 The request may require a report which includes any or all of the following information:
- a) the cause, time and duration of the event;
  - b) the type, volume and concentration of every pollutant discharged as a result of the event;
  - c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
  - d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
  - e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
  - f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
  - g) any other relevant matters.
- R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

## R4 Other notifications

### Notification of Pollution of Waters

- R4.1 The Licensee must notify the EPA by telephoning the Environment Line service on 131555 immediately after the Licensee becomes aware of any contravention or potential contravention of Condition L1 of the Licence.
- R4.2 Within seven days of notifying the EPA of a potential contravention of Condition L1, the Licensee must provide the EPA a written report that explains the cause of the potential contravention and the actions taken to comply with Condition L1 of the Licence.

### Blast Exceedance Notification and Reporting

- R4.3 The Licensee must notify the EPA of any exceedance of Licence blast limits by telephoning the Environment Line Service on 131555 as soon as practicable after the exceedance becomes known to the Licensee or to one of the Licensee's employees or agents.
- R4.4 Within seven days of notifying the EPA of an exceedance of Licence blast limits, the Licensee must provide the EPA a written report that explains the cause of the exceedance and the actions taken to prevent future exceedances of blast limits.

## R5 Other reporting conditions

### Blast Monitoring Compliance Report

- R5.1 The results of the blast monitoring required by condition M7.1 must be submitted to the EPA with the Annual Return at the end of each reporting period.

# Environment Protection Licence

Licence - 563

## HRSTS Reporting

- R5.2 The Licensee must compile a written report of the activities under the Scheme for each scheme year. The scheme year shall run from 1 July to 30 June each year. The written report must be submitted to the EPA's regional office within 60 days after the end of each scheme year and be in a form and manner approved by the EPA. The information will be used by the EPA to compile an annual scheme report.

## Turbidity Report

- R5.3 The Licensee must include graphical analysis of turbidity against discharge from Point 11 measured at EPA Point 11 for the length of any discharges from EPA Point 11 with the Annual Return.

## Sewage Treatment Plant Maintenance Report

- R5.4 The sewage treatment system maintenance program required by Condition O2.6 must be submitted annually to the EPA with the Annual Return.
- R5.5 The licensee must retain a copy of each report required by Condition O2.5 for 3 years from the date each record is made.

## Heavy Plant-Tyre Disposal Report

- R5.6 The Licensee must provide the EPA with the Annual Return a Heavy Plant-Tyre Disposal Report. The Report must include:

a) a plan of the disposed heavy plant waste tyres on the premises for the period that includes:

- (i) each tyre serial number;
- (ii) supplier of each tyre;
- (iii) purchase date of each tyre;
- (iv) disposal date of each tyre;
- (v) co-ordinates (easting and northings) of the disposal of each tyre;
- (vi) the Real Level (RL) in metres AHD of each tyre placed in the pit;
- (vii) the number of tyres buried in a particular area; and
- (viii) the cumulative tonnage of tyres disposed of at the premises each year.

## Water Quality Monitoring Report

- R5.7 The licensee must provide the EPA with its Annual Return an annual water quality monitoring report prepared by an appropriately qualified and experienced person that includes the following:

- a) for the monitoring required by the licence during the reporting period to which the Annual Return relates:
- (i) a summary of results for all ambient water quality monitoring required by the licence in table form and graphical form;
  - (ii) total daily rainfall records from the premises meteorological monitoring required by the licence on the day that the sampling was undertaken in table form;
  - (iii) total daily continuous rainfall records in graphical form; and

# Environment Protection Licence

Licence - 563

(iv) a plan with the monitoring locations.

b) A graphical presentation of the trends of monitoring results required by the licence for the reporting period to which the Annual Return relates and the preceeding data for the period of record the licensee has monitoring results for the licensed location.

c) A graphical representation of total daily continuous rainfall records required by the licence for the record that matches the ambient water quality results, if available.

## 7 General Conditions

### G1 Copy of licence kept at the premises or plant

- G1.1 A copy of this licence must be kept at the premises to which the licence applies.
- G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.
- G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

### G2 Contact number for incidents and responsible employees

- G2.1 The licensee must operate 24-hour telephone contact lines for the purpose of enabling the EPA to directly contact one or more representatives of the licensee who can:
  - a) respond at all times to incidents relating to the premises; and
  - b) contact the licensee’s senior employees or agents authorised at all times to:
    - i) speak on behalf of the licensee; and
    - ii) provide any information or document required under this licence.
- G2.2 The licensee is to inform the EPA in writing of the appointment of any subsequent contact persons, or changes to the person’s contact details as soon as practicable and in any event within fourteen days of the appointment or change.

### G3 Other general conditions

#### G3.1 Completed Programs

Program	Description	Completed Date
Saline discharge dispersion investigation.	Saline discharge dispersion investigation.. Minimise risk of saline discharge to downstream irrigators.	31-December-2011
Coal Tailings Clean Up Nine Mile Creek	Remove Coal Tailings from Nine Mile Creek	04-November-2011

# Environment Protection Licence

Licence - 563

Clean Up Verification Report	Provide a report on clean up activities in Nine Mile Creek	04-November-2011
Environmental Harm Assessment	Provide a report on the actual and potential harm caused by the contamination of Nine Mile Creek with Coal Tailings.	04-November-2011
Coal Mine Particulate Matter Control Best Practice.	Requires licensee to conduct a site specific Best Management Practice (BMP) determination to identify ways to reduce particle emissions.	29-June-2012
Particulate Matter Control Best Practice Implementation – Wheel Generated Dust	Implementation of particulate matter best management practices to address wheel-generated dust.	15-August-2014
Particulate Matter Control Best Practice Implementation – Disturbing and Handling Overburden under Adverse Weather Conditions	Implementation of particulate matter best management practices to address the handling of overburden during adverse weather.	15-August-2014
Particulate Matter Control Best Practice Implementation – Trial of Best Practice Measures for Disturbing and Handling Overburden	Investigation to establish best practice measures for the handling of overburden.	30-July-2014
Coal Mine Wind Erosion of Exposed Land Assessment	Assessment of predicted vs actual exposed lands.	29-May-2015

## 8 Special Conditions

### E1 Hunter River Salinity Trading Scheme (HRSTS)

- E1.1 This licence authorises the discharge of saline water into the Hunter River Catchment from an authorised discharge point (or points), in accordance with the Protection of the Environment Operations (Hunter River Salinity Trading Scheme) Regulation 2002.
- E1.2 For the purposes of Clauses 23 and 29 of the Protection of the Environment Operations (Hunter River Salinity Trading Scheme) Regulation 2002 the licensee must apply the conversion factor of 0.6.
- E1.3 The licensee must not exceed the hourly volume discharge limit calculated using the following formula, at all discharge point(s) on this licence titled "Discharge of saline water under the Hunter River Salinity Trading Scheme (HRSTS)":

$$H = V / RRT$$

Where:

**H** is the hourly volume discharge limit (in megalitres per hour);

# Environment Protection Licence

---

Licence - 563

**V** is the licence holder's volume discharge limit for the block (in megalitres) calculated in accordance with clause 23 of the Protection of the Environment Operations (Hunter River Salinity Trading Scheme) Regulation (2002); and

**RRT** is the difference between the discharge stop and start times shown on the river register for that block (in hours)

**Note 1:** The intent of this condition is to prevent spikes of saline water in the Hunter River as a result of discharges of less than the duration permitted by the river register.

**Note 2:** A river register is issued by the Service Co-ordinator and allows participants of the Hunter River Salinity Trading Scheme (HRSTS) to discharge saline to the Hunter River during a discharge period.

# Environment Protection Licence

Licence - 563

## Dictionary

### General Dictionary

<b>3DGM [in relation to a concentration limit]</b>	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
<b>Act</b>	Means the Protection of the Environment Operations Act 1997
<b>activity</b>	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
<b>actual load</b>	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
<b>AM</b>	Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
<b>AMG</b>	Australian Map Grid
<b>anniversary date</b>	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
<b>annual return</b>	Is defined in R1.1
<b>Approved Methods Publication</b>	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
<b>assessable pollutants</b>	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
<b>BOD</b>	Means biochemical oxygen demand
<b>CEM</b>	Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
<b>COD</b>	Means chemical oxygen demand
<b>composite sample</b>	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
<b>cond.</b>	Means conductivity
<b>environment</b>	Has the same meaning as in the Protection of the Environment Operations Act 1997
<b>environment protection legislation</b>	Has the same meaning as in the Protection of the Environment Administration Act 1991
<b>EPA</b>	Means Environment Protection Authority of New South Wales.
<b>fee-based activity classification</b>	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2009.
<b>general solid waste (non-putrescible)</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997

# Environment Protection Licence

Licence - 563

<b>flow weighted composite sample</b>	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
<b>general solid waste (putrescible)</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
<b>grab sample</b>	Means a single sample taken at a point at a single time
<b>hazardous waste</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
<b>licensee</b>	Means the licence holder described at the front of this licence
<b>load calculation protocol</b>	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
<b>local authority</b>	Has the same meaning as in the Protection of the Environment Operations Act 1997
<b>material harm</b>	Has the same meaning as in section 147 Protection of the Environment Operations Act 1997
<b>MBAS</b>	Means methylene blue active substances
<b>Minister</b>	Means the Minister administering the Protection of the Environment Operations Act 1997
<b>mobile plant</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
<b>motor vehicle</b>	Has the same meaning as in the Protection of the Environment Operations Act 1997
<b>O&amp;G</b>	Means oil and grease
<b>percentile [in relation to a concentration limit of a sample]</b>	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
<b>plant</b>	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
<b>pollution of waters [or water pollution]</b>	Has the same meaning as in the Protection of the Environment Operations Act 1997
<b>premises</b>	Means the premises described in condition A2.1
<b>public authority</b>	Has the same meaning as in the Protection of the Environment Operations Act 1997
<b>regional office</b>	Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence
<b>reporting period</b>	For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
<b>restricted solid waste</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
<b>scheduled activity</b>	Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997
<b>special waste</b>	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
<b>TM</b>	Together with a number, means a test method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
