Are you kidding me? This ludicrous so called “sustainable” logging is going to obliterate a whole swath of a pristine, natural heritage site. Not to mention destroy many species of wildlife!

None whatsoever. It’s environmental vandalism perpetuated by a state government so out of touch it’s actually quite depressing.
Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

All of it.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

Wait a minute, what exactly are you protecting?

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No as it's outright backwards thinking, illogical environmental vandalism.

Q21. General comments
