Q1. First name

Sandra

Q2. Last name

Shergill

Q3. Phone

[redacted]

Q4. Mobile

[redacted]

Q5. Email

[redacted]

Q6. Postcode

[redacted]

Q7. Country

Australia

Q8. Stakeholder type

Individual

Q9. Stakeholder type - Other

not answered

Q10. Stakeholder type - Staff

not answered

Q11. Organisation name

not answered

Q12. What is your preferred method of contact?

not answered

Q13. Would you like to receive further information and updates on IFOA and forestry matters?

Yes

Q14. Can the EPA make your submission public?

Yes

Q15. Have you previously engaged with the EPA on forestry issues?

No

Q16. What parts of the draft Coastal IFOA are most important to you? Why?

The parts that are important are any parts that propose logging the remnants of our native forests. I do not trust forestry industry to do the right thing.

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?

None
Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Too much forest will be destroyed and so will the native animals that depend on it.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

I do not trust the government or logging industry to do the right thing and am against further logging of our native forests. I think "environmental protection" is a very low priority for the logging industry.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No, I don't believe so, because there is too much timber taken and our native animals and habitats are given scant consideration. Therefore I am in opposition to the draft. Many thanks.

Q21. General comments

Our Native forests are being decimated, against the will of the Australian people and for the benefit of a few. Stop this carnage of our forests and native animals, it is virtually a criminal act, and no one trusts forestry industry or government to provide adequate protection. I object. many thanks.
