Q1. First name  
Tess

Q2. Last name  
Winter

Q3. Phone  
not answered

Q4. Mobile  
not answered

Q5. Email  
[REDACTED]

Q6. Postcode  
[REDACTED]

Q7. Country  
Australia

Q8. Stakeholder type  
Individual

Q9. Stakeholder type - Other  
not answered

Q10. Stakeholder type - Staff  
not answered

Q11. Organisation name  
not answered

Q12. What is your preferred method of contact?  
Email

Q13. Would you like to receive further information and updates on IFOA and forestry matters?  
No

Q14. Can the EPA make your submission public?  
Yes

Q15. Have you previously engaged with the EPA on forestry issues?  
No

Q16. What parts of the draft Coastal IFOA are most important to you? Why?  
not answered

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?  
not answered
Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

not answered

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

not answered

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. Because it's not sustainable.

Q21. General comments

Australia have denuded its forests and is still planning on doing so. This is crazy in a world subjected to climate change realities, and in a country subjected to bushfires, drought, and where much of the shade and trees are already gone. The only logging that should ever happen from now on should be from trees grown for the purpose, hemp, and bamboo.
