

**Respondent No:** 10

**Login:** Anonymous

**Email:** n/a

**Responded At:** May 29, 2018 06:40:03 am

**Last Seen:** May 29, 2018 06:40:03 am

**IP Address:** n/a

Q1. <b>First name</b>	Edward
Q2. <b>Last name</b>	Caruana
Q3. <b>Phone</b>	not answered
Q4. <b>Mobile</b>	[REDACTED]
Q5. <b>Email</b>	[REDACTED]
Q6. <b>Postcode</b>	[REDACTED]
Q7. <b>Country</b>	Australia
Q8. <b>Stakeholder type</b>	Individual
Q9. <b>Stakeholder type - Other</b>	not answered
Q10. <b>Stakeholder type - Staff</b>	not answered
Q11. <b>Organisation name</b>	not answered
Q12. <b>What is your preferred method of contact?</b>	Email
Q13. <b>Would you like to receive further information and updates on IFOA and forestry matters?</b>	Yes
Q14. <b>Can the EPA make your submission public?</b>	Yes
Q15. <b>Have you previously engaged with the EPA on forestry issues?</b>	No
Q16. <b>What parts of the draft Coastal IFOA are most important to you? Why?</b>	Mid North Coast Forests, Grafton to Taree
Q17. <b>What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?</b>	The existing laws are sufficient

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Opening up more clear felling without any thought for protecting Flora and Fauna. Koalas are endangered, more habitat loss especially clear felling is insane.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

There needs to be balance, too often \$ take precedence over sustainability. We need a prosperous forestry industry we do not need one that is not sustainable.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No, impact assessments and moreover strategic impacts need serious review. Forests are also enjoyed by recreational tourists, locals etc.....consider the impact of clearing vast amounts of land, animal habitats etc.....BALANCE, not greed....

---

**Q21. General comments**

Enough is enough, \$ is not the only thing that matters!
