

**Respondent No:** 170

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jun 26, 2018 08:03:57 am

**Last Seen:** Jun 26, 2018 08:03:57 am

**IP Address:** n/a

- Q1. **First name** Lyn
- 
- Q2. **Last name** Walker
- 
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** not answered
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** not answered
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes
- Q15. **Have you previously engaged with the EPA on forestry issues?** No
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**  
The removal of existing protections. These protections are needed for sustainable Ecological development. Anything else will be a long term disaster
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**  
None

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

All of it.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

they will not be effective. present protections are limited enough and not enforced. These are a none event.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No. A sustainable timber industry will only be achieved if it is restricted to plantation timber with some extreme rare native forest logs for specialist woodwork.

---

**Q21. General comments**

The only changes to logging rules that are acceptable are those that are environmentally sustainable. Instead I call upon the NSW government to: 1 Increase protections for all native forests whether old growth or regrowth forests. At the very least this means forbid any logging in them. a) Use only plantation trees for logging b) Subsidise only native forests and transfer existing subsidies from logging to forest regrowth and restoration 2. Increase protections for threatened species. 3. Protect all waterways. 4. Implement strict enforcement procedures to achieve the above three points.
