

**Respondent No:** 354

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jul 07, 2018 08:21:52 am

**Last Seen:** Jul 07, 2018 08:21:52 am

**IP Address:** n/a

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** not answered
- Q4. **Mobile** [REDACTED]
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** not answered
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** Yes

**Q16. What parts of the draft Coastal IFOA are most important to you? Why?**

I object to the draft Coastal IFOA in its entirety as it will weaken protection of old growth forest and rainforest, threatened species and waterways.

**Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**

I don't see any part of the draft Coastal IFOA that will have a positive outcome on management of environmental values or production of sustainable timber. I believe all timber produced and harvested should be resourced from plantations, not native forests.

---

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Reduction of stream buffers will threaten riparian habitat and water quality. Harvesting timber from native forests will reduce ecosystem health and exacerbate climate change. All native forests should be protected from timber harvesting for their contribution to clean air and water, carbon sequestration, wildlife and threatened species habitat and corridor connectivity

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

I believe all timber produced and harvested should be resourced from plantations, not native forests. All native forests should be protected from timber harvesting for their contribution to clean air and water, carbon sequestration, wildlife and threatened species habitat and corridor connectivity

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No. I believe all timber produced and harvested should be resourced from plantations, not native forests. All native forests should be protected from timber harvesting for their contribution to clean air and water, carbon sequestration, wildlife and threatened species habitat and corridor connectivity

---

**Q21. General comments**

not answered

---

**Q22. Attach your supporting documents (Document 1)**      not answered

---

**Q23. Attach your supporting documents (Document 2)**      not answered

---

**Q24. Attach your supporting documents (Document 3)**      not answered
