

**Respondent No:** 366

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jul 07, 2018 09:43:40 am

**Last Seen:** Jul 07, 2018 09:43:40 am

**IP Address:** n/a

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** not answered
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** Ms
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** Yes

**Q16. What parts of the draft Coastal IFOA are most important to you? Why?**

Logging of koala habitat. Surely this is so important it is a no-brainer for anyone who even has half a brain. Our native forests and their inhabitants are being put last because of vested interests. This is totally unacceptable to 99% of the population of Australia. The only ones who benefit are the vested interests who want short term profits using our native forests as a free resource. THIS MUST STOP NOW.

**Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**

Preservation of old growth forests and plans for plantation timber on already cleared lands. Rehabilitation of areas of forest that have been previously logged. This is the only way biodiversity can be preserved and climate change effects minimised.

---

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Old growth forests MUST be retained and the timber industry must rely on plantation timber for long term supply.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

Multi scale protection is essential to preserve biodiversity of flora and fauna. We must have large areas of forested native habitat and ensure that our landscapes offer protection from climate change.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No not while vast areas of native old growth forest is logged. Why? For all the reasons stated above: loss of habitat, especially critical koala habitat; climate change worsening with deforestation; loss of biodiversity; and all this for what?? the short term profits of vested interests who want to use public land at taxpayers expense.

---

**Q21. General comments**

These new proposed laws are a disaster for our environment at all levels.
