- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** not answered
- Q4. **Mobile** [REDACTED]
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**
not answered
- Q10. **Stakeholder type - Staff**
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** No
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** No

Q16. What parts of the draft Coastal IFOA are most important to you? Why?

I own converted forest country on the NSW North Coast and am doing my bit to protect part of the last remaining endangered coastal forest communities. Too much of these forests have been damaged by logging and farming. Logging needs to stop now and protection enacted to preserve what is left for future generations.

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?

None!

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Logging

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

The protections will be too little and mostly too late.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. Logging ruins our native forests.

Q21. General comments

Logging continues to ruin our native forests. All logging must stop. It is old world practice that has no place in today's modern society. Remaining forests urgently need to be locked up to preserve our dwindling reserves and their endangered flora and fauna. Forests need to come first, not easy profits for the greedy.
