

**Respondent No:** 386

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jul 07, 2018 13:29:14 pm

**Last Seen:** Jul 07, 2018 13:29:14 pm

**IP Address:** n/a

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** not answered
- Q4. **Mobile** [REDACTED]
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** not answered
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** Yes
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** No
- Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**  
If implemented, these laws will see the logging of protected old-growth, clearfelling of 45-hectare blocks of koala habitat.
- Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**  
None. Destroying what is left of the ecological values of state forests and logging protected areas to meet wood supply is not the action of a responsible Government.

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

The new IFOA ignores reality. Widespread declines in wildlife has prompted the Australian Senate to call an inquiry into our threatened species crisis. Overlogging has reduced sawlog resources throughout coastal NSW, a fact recognised by the industry itself. The number of jobs and mills has collapsed and logging now accounts for about 0.03% of primary industries employment. This will get worse as climate change and forest dieback make future timber resources increasingly uncertain—an issue highlighted in the the Natural Resources Commission report but ignored in the IFOA. The new IFOA will heighten the impacts of logging on threatened species, and exacerbate key threatening processes such as the loss of hollow-bearing trees and bell-miner associated dieback. The intensive harvesting zone will destroy almost half of the mapped high-quality koala habitat in state forests.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

The best use of forests is to protect the wildlife that the tourism industry depends upon; protect the water supplies that our communities rely on and store the carbon that is driving climate breakdown.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

No. Clear felling, especially clear felling old growth forests is not at all sustainable. It is highly destructive to wildlife, water quality and the environment.
