

**Respondent No:** 396

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jul 07, 2018 14:53:34 pm

**Last Seen:** Jul 07, 2018 14:53:34 pm

**IP Address:** n/a

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** not answered
- Q4. **Mobile** [REDACTED]
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** not answered
- Q8. **Stakeholder type** Individual
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** not answered
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** No
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** No

**Q16. What parts of the draft Coastal IFOA are most important to you? Why?**

Actually, the whole of our coast, in those rare places where there is still untouched old-growth forests! These forests are the last bastions for our dwindling wildlife. Once they are gone, the forestry industry will still need more resources, so why not preserve what is irreplaceable now and move immediately to plantation growth? Leave our wild old-growth forests for the wildlife and future generations.

**Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**

Plantation forest resources should be the only source of timber. See above.

---

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

If old-growth forest is logged, that is a huge negative impact on the environment and our future. Once it is gone, it's gone forever!

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

Not compatible! The untouched forests must stay unlogged. A "combination" is like death and pregnancy. It either is or isn't! There is no half-way measure. Leave the old-growth forests alone. There is so very little left. I haven't even touched on climate change, carbon sequestration, preservation of rare wildlife!

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

NO! See all above.

---

**Q21. General comments**

Please, you know that logging cannot be environmentally friendly, regardless of what the "timber industry" might say they would do.
