

**Respondent No:** 608

**Login:** Anonymous

**Email:** n/a

**Responded At:** Jul 13, 2018 22:25:19 pm

**Last Seen:** Jul 13, 2018 22:25:19 pm

**IP Address:** n/a

- Q1. **First name** [REDACTED]
- Q2. **Last name** [REDACTED]
- Q3. **Phone** [REDACTED]
- Q4. **Mobile** not answered
- Q5. **Email** [REDACTED]
- Q6. **Postcode** [REDACTED]
- Q7. **Country** Australia
- Q8. **Stakeholder type** Community group
- Q9. **Stakeholder type - Other**  
not answered
- Q10. **Stakeholder type - Staff**  
not answered
- Q11. **Organisation name** Mrs
- Q12. **What is your preferred method of contact?** Email
- Q13. **Would you like to receive further information and updates on IFOA and forestry matters?** No
- Q14. **Can the EPA make your submission public?** Yes, but anonymous
- Q15. **Have you previously engaged with the EPA on forestry issues?** No

Q16. **What parts of the draft Coastal IFOA are most important to you? Why?**

Protection of habitat for present and future generations so that our native fauna and flora are preserved.

Q17. **What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?**

Monitoring and careful planning of ecologically sustainable harvesting and management of our native forests are of utmost importance. Who would be responsible for maintaining the health of the forests. Once they are disturbed ferral weeds and ferral creatures gain access to these areas and native species suffer.

**Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?**

Concern where monocultures are planted and mechanical harvesting causes damage to understorey species and destruction of habitat.

---

**Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?**

There here need to be significant areas of permanent environmental protection. The destruction of our native forests has already had a huge impact so that pockets of forest are no longer connected and corridors for movement of avian and terrestrial species have nowhere to go. This in turn limits the diversity of gene pools in particular species, reduces food sources seasonally, particularly in drought/ flood periods.

---

**Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?**

I feel very pessimistic about the plan.

---

**Q21. General comments**

See above
