None

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

Natural habitat destruction will escalate

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

There needs to be more protections put in place to protect what is left of our forests, bushland and native wildlife habitats, not less.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. People want money and homes for wildlife don't pay (except in the tourist industry which everyone seems to forget)

Q21. General comments

We need more protections for habitat. Look at what has happened in Queensland in recent years!!!
