# Executive summary 2009–2010

This is the fifth annual report outlining the performance of local government councils' kerbside and drop-off waste, recycling and resource recovery services in NSW based on information provided by Councils. The report amalgamated and relied entirely on the data reported by individual councils.

Reported kerbside collection of dry recyclables and household organics:

- There has been a progressive increase in the overall recycling performance from kerbside dry recyclables and garden organics from 644,021 tonnes in 2000–01 to 1.12 million tonnes in 2009–10
- An average 5.53 kg per week of dry recyclables were collected at the kerbside per household in 2009–10, for the 125 councils that reported dry recycling kerbside collections
- Total dry recyclables collected at the kerbside increased by 277,006 tonnes or 61.6% relative to 2000–01, to reach 726,432 tonnes in 2009–10
- An average 5.02 kg per week of household organics were collected at the kerbside per household in 2009–10, for the 60 councils that reported
- Total household organics collected at the kerbside increased by 202,794 tonnes or 104.2%, relative to 2000–01, to reach 397,390 tonnes in 2009–10.

Reported residual waste collections:

- An average 12.13 kg per week of residual waste was collected at the kerbside per household in 2009–10, for the 150 councils that reported
- Total residual waste collected at the kerbside increased by 352 tonnes relative to 2005–06, to reach 1,641,018 tonnes in 2009–10
- The amount of residual waste collected that was reported as recovered through an Alternative Waste Technology (AWT) treatment facility was 148,415 in 2009–10

Reported kerbside clean up:

- Total kerbside cleanup collection of waste, for the 93 councils that reported, was 136,600 tonnes in 2009–10, of which 27,572 tonnes were recycled

Drop off facilities:

- Total reported domestic waste dropped off, at the 121 councils that reported, was 532,511 tonnes in 2009–10, of which 237,208 was recycled

Household waste resource recovery rate:

- NSW total domestic recovery rate (Includes kerbside, clean up and drop off) has increased from 37.8% in 2005–06 to 45.1% in 2009–10

**Table 1: Total Domestic Resource Recovery Rates 2005–06 to 2009–10**

Recovery rate	2005–06	2006–07	2007–08	2008–09	2009–10
NSW	37.8%	40.8%	43.2%	43.7%	45.1%

**OEH acknowledges the cooperation and contribution of all NSW councils in providing the data presented within this report. Please note that the information within this report is entirely dependent on the accuracy of data supplied by councils in the 2009–10 survey. While OEH has made an effort to verify the information supplied by councils wherever possible, OEH is not able to validate the raw data that forms the basis of this report.**

## Background

This report amalgamated information provided by individual councils in response to an Office of Environment and Heritage (OEH) survey of all NSW local government councils to determine the characteristics of waste and resource recovery services available to residents of NSW for the year 2009–10. The survey incorporated the information required under the National Environment Protection Measure (NEPM) for Used Packaging Materials<sup>1</sup> in addition to information relating to domestic resource recovery as well as waste collection and disposal. Not all councils reported on all items in the survey.

This report should assist councils in making decisions and assessing progress against the goals and targets in the *NSW Waste Avoidance and Resource Recovery Strategy*<sup>2</sup>.

This report contains information as follows:

Population figures that were used for per capita calculations are derived from the Australian Bureau of Statistics (ABS) population estimates<sup>3</sup>. The population figures used are from, and refer to, population projections as at 30 June 2009. OEH used the figure from the start of the financial year as the ABS does not release the next year's figures until December.

3 ABS: Cat. No. 3218.055.001 Regional Population Growth, Australia – companion data

# 1. Kerbside collection of recyclables

Collection of kerbside dry recyclables and organics has progressively increased since the commencement of reporting, from 644,021 tonnes in 2000–01 to 1.12 million tonnes in 2009–10.

**Table 2: Annual NSW reported tonnages of recyclables collected at kerbside Tonnes (000's)**

	2000–01	2001–02	2002–03	2003–04	2004–05	2005–06	2006–07	2007–08	2008–09	2009–10
<b>Dry recyclables</b>	449.43	487.45	539.07	581.40	592.23	609.33	661.47	689.73	687.23	726.43
<b>Organics</b>	194.60	207.06	198.40	205.08	226.19	270.40	288.85	343.65	355.26	397.39
<b>Total kerbside</b>	644.03	694.51	737.47	786.48	818.42	879.73	950.33	1,033.38	1,042.49	1,123.82

## 1.1 Dry recyclables collection

One hundred and twenty six (126) of all NSW councils provided a kerbside dry recyclables collection service, reaching 96% of households within councils providing service and 93% of all households in NSW. Compared to the previous year, one council in RRA region and two councils in rest of the State extended dry recycling service to its residents. Service availability varied across NSW.

Most councils were able to obtain data from the facilities receiving and processing their dry recyclables. However, some councils may have only been able to provide an estimate of tonnes of recycled material and the quality of data may vary.

**Table 3: Percentage coverage of household within council providing a dry recycling service in NSW<sup>4</sup>**

Region	No. of councils providing service	Household		
		Total <sup>5</sup>	Coverage percentage % <sup>6</sup> (NSW/Region with service)	Coverage percentage % <sup>7</sup> (NSW/Region)
NSW	126	2,526,151	96.02%	93.48%
SMA <sup>8</sup>	38	1,437,585	98.07%	98.07%
ERA <sup>9</sup>	13	519,351	98.66%	98.66%
RRA <sup>10</sup>	20	288,271	94.55%	93.33%
Rest of the state	55	280,944	84.17%	70.02%

4 Refer Appendix 6 for total NSW and regional figures

5 Represents households within councils offering a kerbside recycling service

6 Coverage percentage of households within NSW/Region offering a service

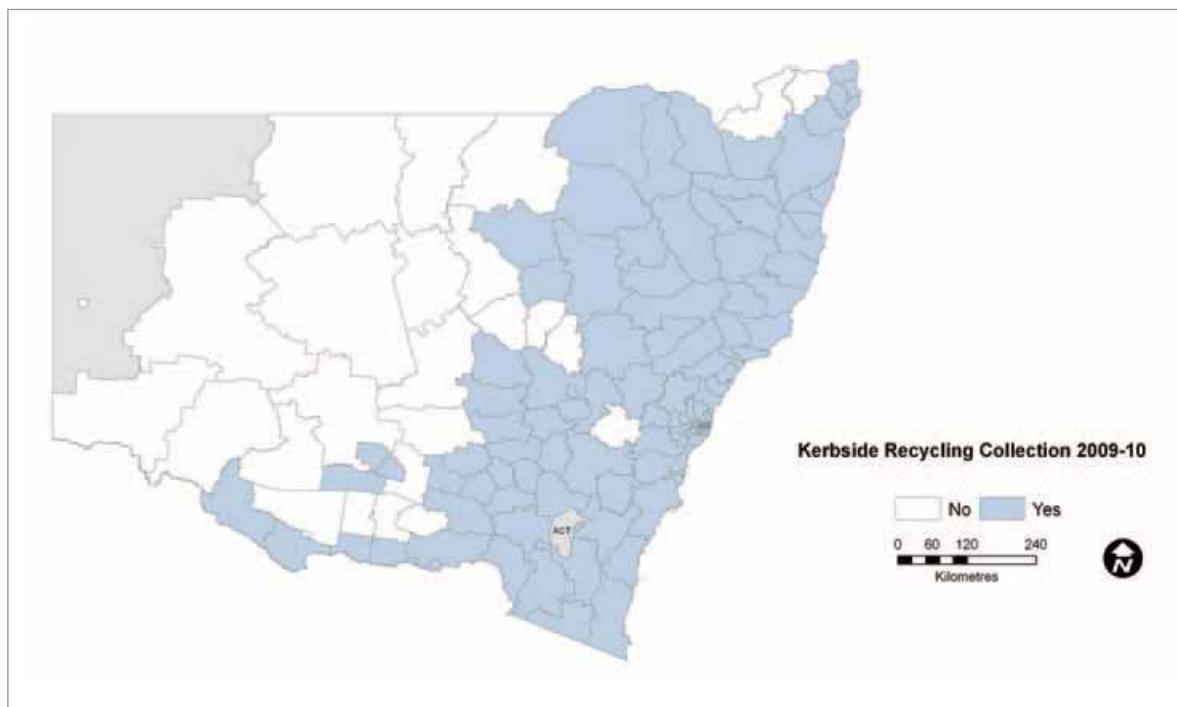

7 Coverage percentage of households within NSW/Region with an actual service

8 Sydney Metropolitan Area

9 Extended Regulated Area

10 Regional Regulated Area

**Figure 1: NSW councils providing kerbside dry recycling collection services**

An average of 288kg of dry recyclables was collected per household with a recycling service in 2009–10. This equates to an average of 5.53 kg per household or 2.01 kg per person, per week.

**Table 4: Average reported annual quantity of kerbside dry recyclables collected by household and population**

Region	No. of councils reporting	Household <sup>11</sup>		Population <sup>12</sup>	
		Annual kg/hh/yr	Weekly kg/hh/wk	Annual kg/ca/yr	Weekly kg/ca/wk
<b>NSW</b>	125 *	287.76	5.53	104.50	2.01
<b>SMA</b>	38	288.84	5.55	103.71	1.99
<b>ERA</b>	13	279.05	5.37	107.23	2.06
<b>RRA</b>	20	300.82	5.78	113.99	2.18
<b>Rest of the state</b>	54	284.93	5.48	95.82	1.84

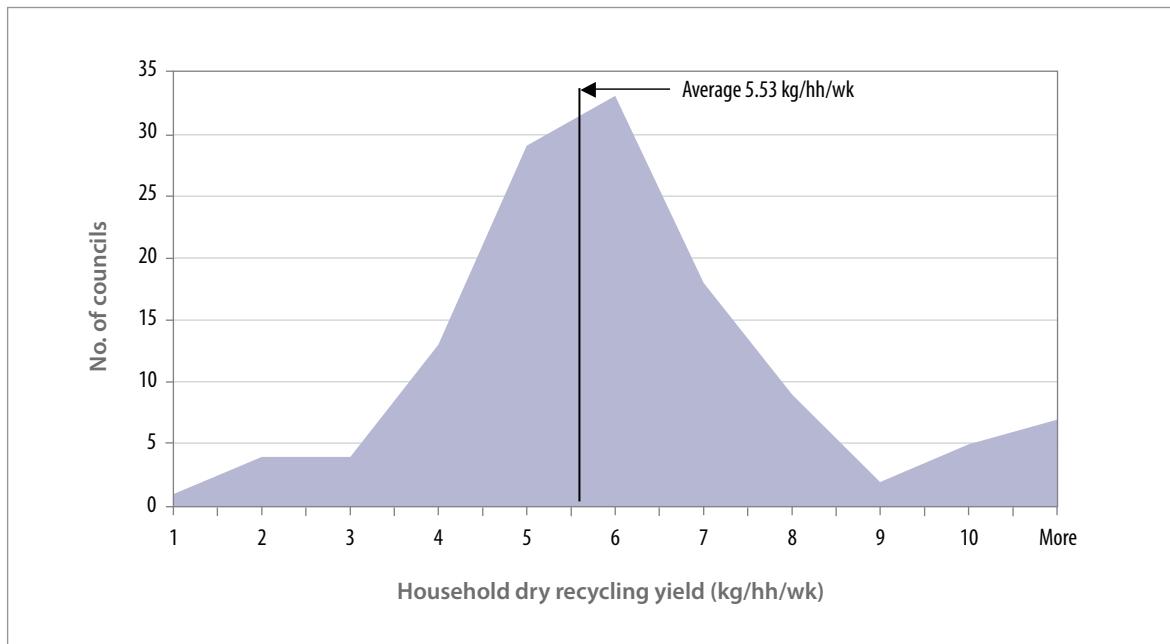

\* Represents only those councils reporting the dry recycling collection figures

Annual average reported collection of dry recyclables increased by 10 kg/hh/yr compared to the previous year (278 kg/hh/yr, 2008–2009) and the average in RRA (300.82 kg/hh/yr) was higher than the state average for councils that report on the service. Of the 125 councils in NSW that provided a kerbside dry recyclable collection, 22 had collected less than 4 kg per household per week, and 41 councils exceeded 6 kg on average (Figure 2).

11 Based on total number of households within reporting councils

12 Based on total population within reporting councils

**Figure 2: Average reported kerbside dry recyclables collected per household across local government areas**

NSW councils used six different dry recycling collection systems in 2009–10 (Table 5). OEH preferred collection systems for dry recyclables (either 240L fully commingled MGB or dual 120L MGBs for paper and containers) was used by 101 councils in total. Standardised collection systems facilitate education, improve understanding and use of recycling systems by residents.

**Table 5: Average reported annual quantity of kerbside dry recyclables collected, by collection system<sup>13</sup>**

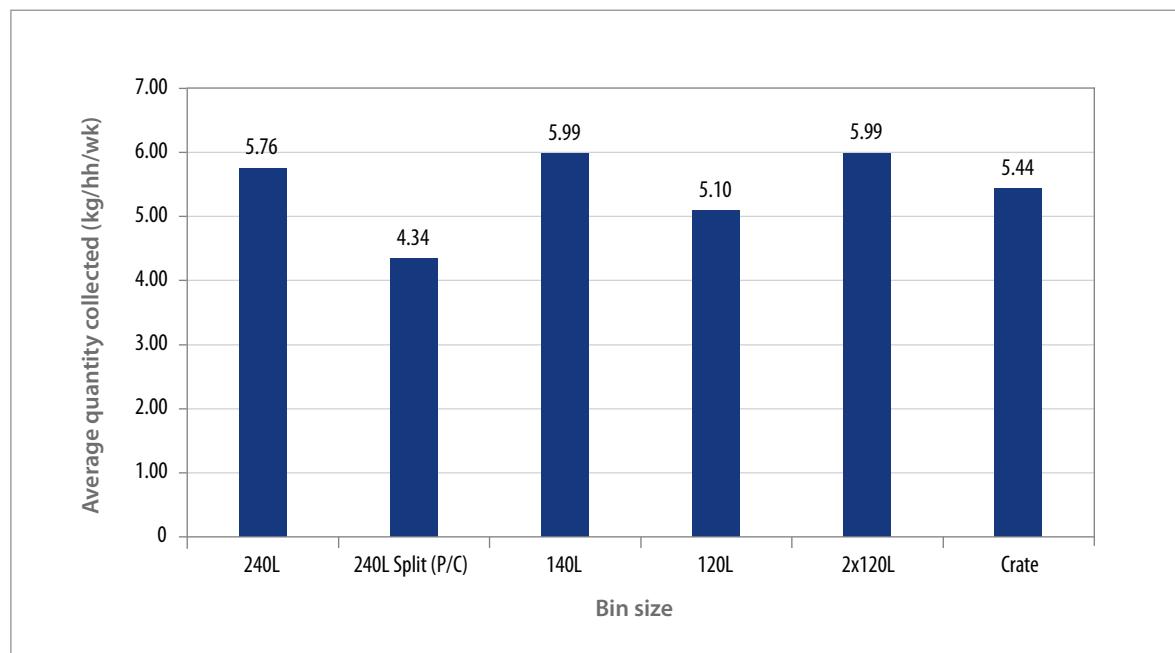

Collection system	SMA	ERA	RRA	Rest of the state	No. of councils	Household collections	
						kg/hh/yr	kg/hh/wk
240L MGB	30	10	17	40	97	299.32	5.76
240L MGB split (Paper/commingled)	–	3	2	1	6	225.82	4.34
140L MGB	3	–	1	–	4	311.40	5.99
120L MGB	–	–	–	2	2	265.12	5.10
2 x 120L MGB Dual Bins	4	–	–	–	4	311.52	5.99
Crate	1	–	–	9	10	319.69	5.44
Other *	–	–	–	2	2	213.79	4.11
No kerbside recycling collection service	–	–	1	25	26	–	–

\* Combination of Tied and Bundled + Crate+ MGBs, or mix of MGBs, or crates + MGBs

13 The average annual figure is based on predominant bin size and larger proportion of dwelling types within councils. Also excludes non reporting councils for the period.

Figure 3 compares average weekly household dry recyclables collected by collection system type. One of the preferred collection systems (240L MGB) collected an average of 5.76 kg/hh/wk and was used by 77% (97 councils) of the councils with kerbside recycling service. The other preferred collection system (120L MGB dual bins) showed the highest average collection at 5.99 kg/hh/wk in 2009–10 with only four councils within SMA using the system type.

**Figure 3: Average reported weekly kerbside dry recyclables collected, by collection system**

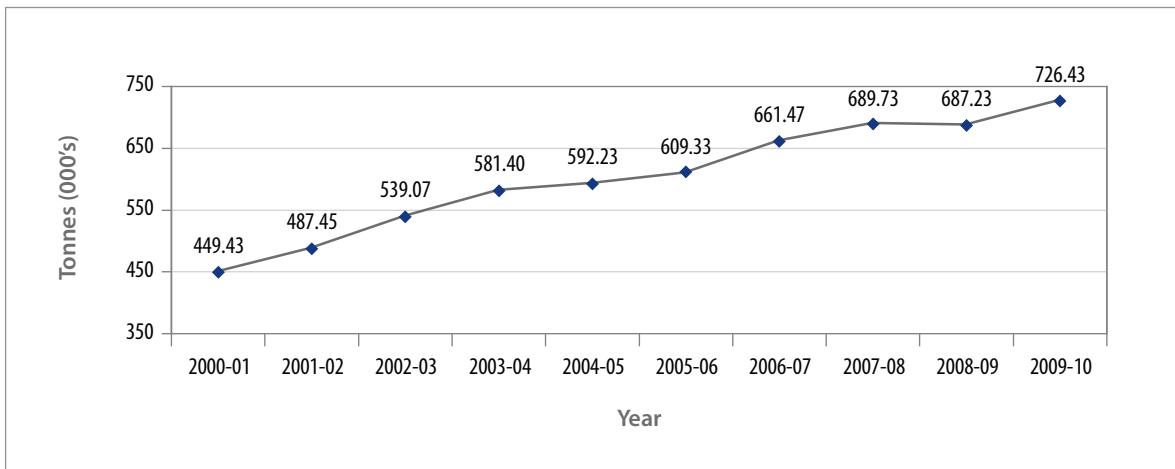

Kerbside collection of dry recyclables increased by over 39,197 tonnes or 5.70% in 2009–10 relative to 2008–09 period. The SMA and ERA reported kerbside collection increase of 3.6% and 4.8%, while the RRA and rest of the State reported 10.3% and 10.6% increment respectively compared to 2008–09.

Total dry recyclables collected at the kerbside in NSW in 2009–10 was 726,432 tonnes with 415,232 tonnes collected from the SMA; 144,924 tonnes from the ERA; 86,717 tonnes from the RRA and 79,559 tonnes from the rest of the State.

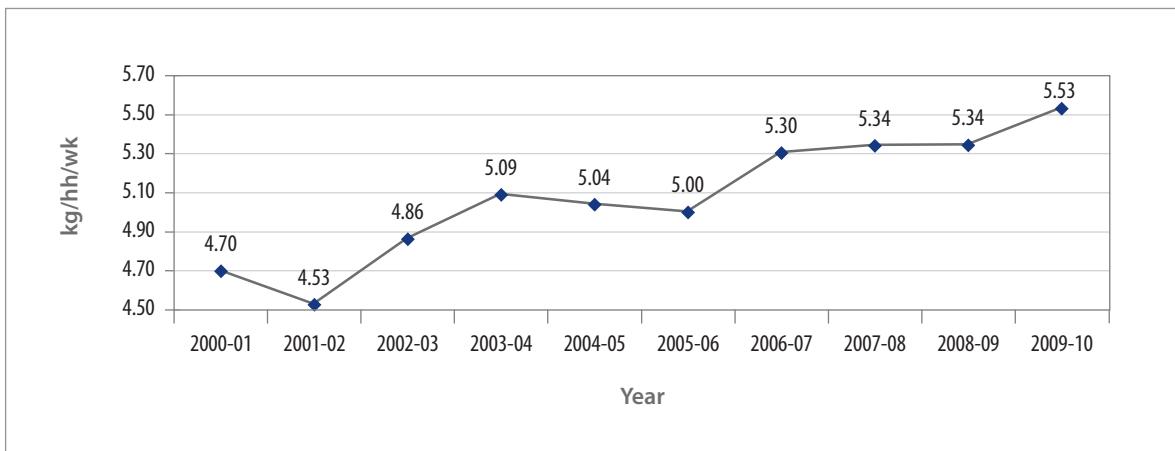

The increase in the quantity of dry recyclables in 2009–10, is 277,006 tonnes or 61.6% relative to 2000–01 collection figures.

**Figure 4: Reported annual kerbside dry recyclables collected in NSW**

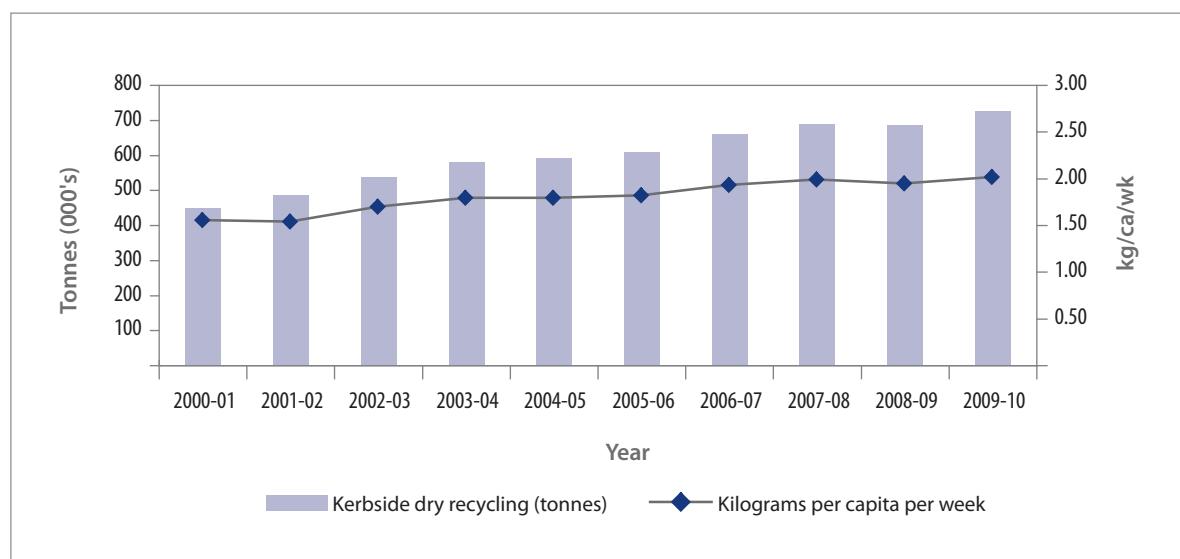

Average household recyclables collected per week increased from 4.70kg in 2001–02 to 5.53 kg in 2009–10 period.

**Figure 5: Reported average kerbside dry recyclables collected per week in NSW**

Similarly, the average per capita collection of dry recyclables increased in line with an overall increase in the quantity of dry recyclables collected in NSW (Figure 6). The increases may be due to both an increase in councils offering new or expanding recycling service and improved recycling behaviour by residents.

**Figure 6: Reported annual and average weekly per capita collection of kerbside dry recyclables in NSW**

### ***Environmental benefits of recovering dry recyclables***

Recycling results in the avoidance of environmental impacts associated with resource extraction, materials production and manufacturing processes. The environmental benefits of the community recycling 726,432 tonnes of dry recyclables in NSW during 2009–10 are demonstrated using the Environmental Benefits of Recycling Calculator<sup>14</sup>. The indicators used in the calculator are greenhouse benefits, energy and water savings, as well as landfill space saved. All benefits are net benefits, that is, they are the benefits after the average impacts of collection, transporting and reprocessing have been accounted for.

The recycling of 726,432 tonnes of resources also saves 2,001,867 m<sup>3</sup> of landfill space, 87,038 cars permanently removed from the road, 56,015 blocks of 10 household's annual electricity requirements and 128,644 persons annual water usage.

14 For further information: <http://www.environment.nsw.gov.au/warr/BenefitRecycling.htm>

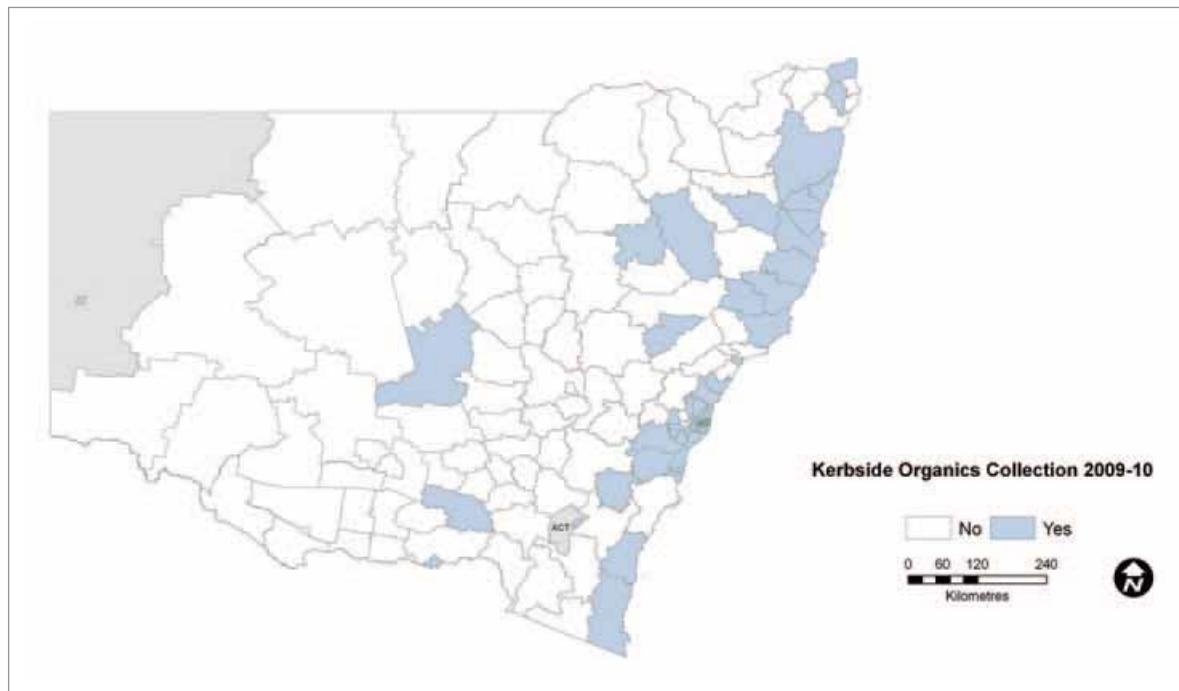

## 1.2 Kerbside organics collection

Sixty four NSW councils provided kerbside garden organics collections in 2009–10, reaching 85% of households within councils providing service and only 60% of all households in NSW (Table 6 and Figure 7). Some councils could only provide estimates of quantities recovered.

**Table 6: Percentage coverage of household and population with garden organics service in NSW**

Region	No. of councils providing service	Household		
		Total <sup>15</sup>	Coverage percentage % <sup>16</sup> (NSW/Region with service)	Coverage percentage % <sup>17</sup> (NSW/Region)
<b>NSW</b>	64	1,615,142	84.97%	59.77%
<b>SMA</b>	33	1,037,031	84.61%	70.75%
<b>ERA</b>	6	292,646	99.11%	55.59%
<b>RRA</b>	13	153,206	70.24%	49.60%
<b>Rest of the state</b>	12	132,259	81.68%	32.97%

**Figure 7: NSW councils providing kerbside garden organics collection services**

15 Represents households within those councils receiving kerbside garden organics service

16 Coverage percentage of households within NSW/Region offering a service

17 Coverage percentage of households within NSW/Region with an actual service

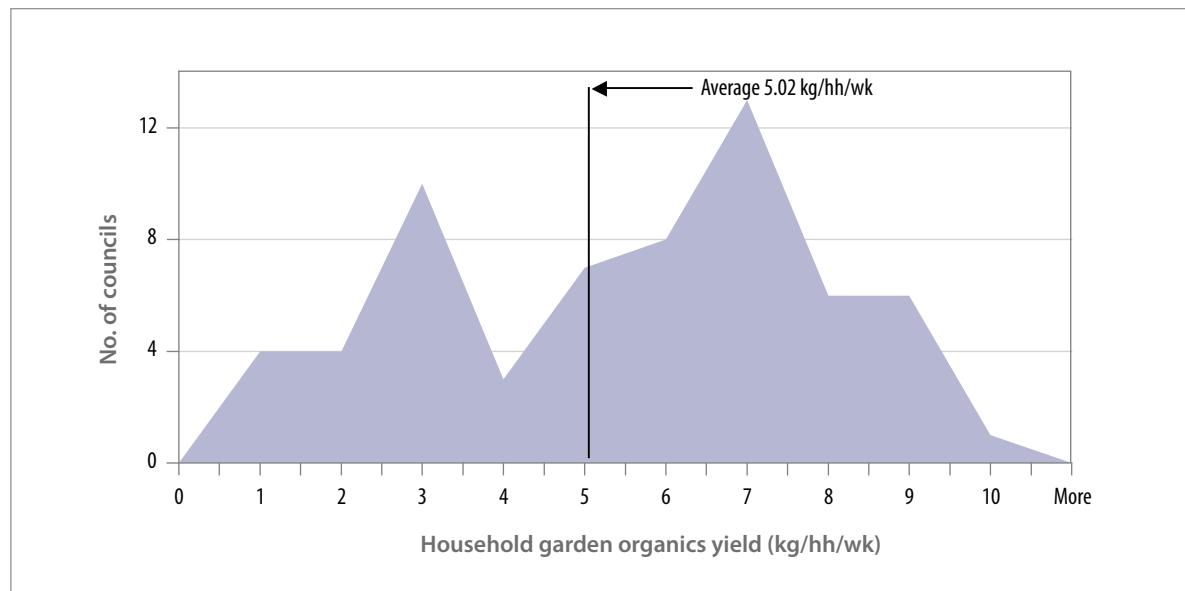

An average of 261 kg of garden organic material was collected per household in 2009–10 in those councils that provided and reported on that service. That equated to an average of 5.02 kg per household per week or 1.62 kg per person per week. Sixty (60) councils reported collection quantities.

**Table 7: Average reported annual quantity of kerbside garden organics collected by household and population \***

Region	No. of councils reporting	Household <sup>18</sup>		Population <sup>19</sup>	
		Annual kg/hh/yr	Weekly kg/hh/wk	Annual kg/ca/yr	Weekly kg/ca/wk
<b>NSW</b>	60 *	261.11	5.02	84.10	1.62
<b>SMA</b>	33	249.66	4.80	79.24	1.52
<b>ERA</b>	5	301.36	5.80	116.24	2.24
<b>RRA</b>	12	319.67	6.15	90.01	1.73
<b>Rest of the state</b>	10	196.87	3.79	62.61	1.20

\* Represents only those councils reporting garden organics collection figures.

**Figure 8: Average reported kerbside garden organics collected per household across local government areas**

In 2009–10, the most common garden organics collection system provided by councils was a 240L MGB with varied collection frequency. Of those, 41 councils collected fortnightly, 9 councils collected weekly and 5 councils collected monthly. The other common collection system was a combination of various systems-tied and bundled, crates, MGB's or mixture of these systems; collected fortnightly, on call or monthly.

The OEH preferred resource recovery practices by Local Councils Guide recommends a 240L MGB collected fortnightly for councils with high volumes of 175 kg or more per household per year.

**Table 8: Average reported annual quantity of kerbside garden organics collected, by collection system**

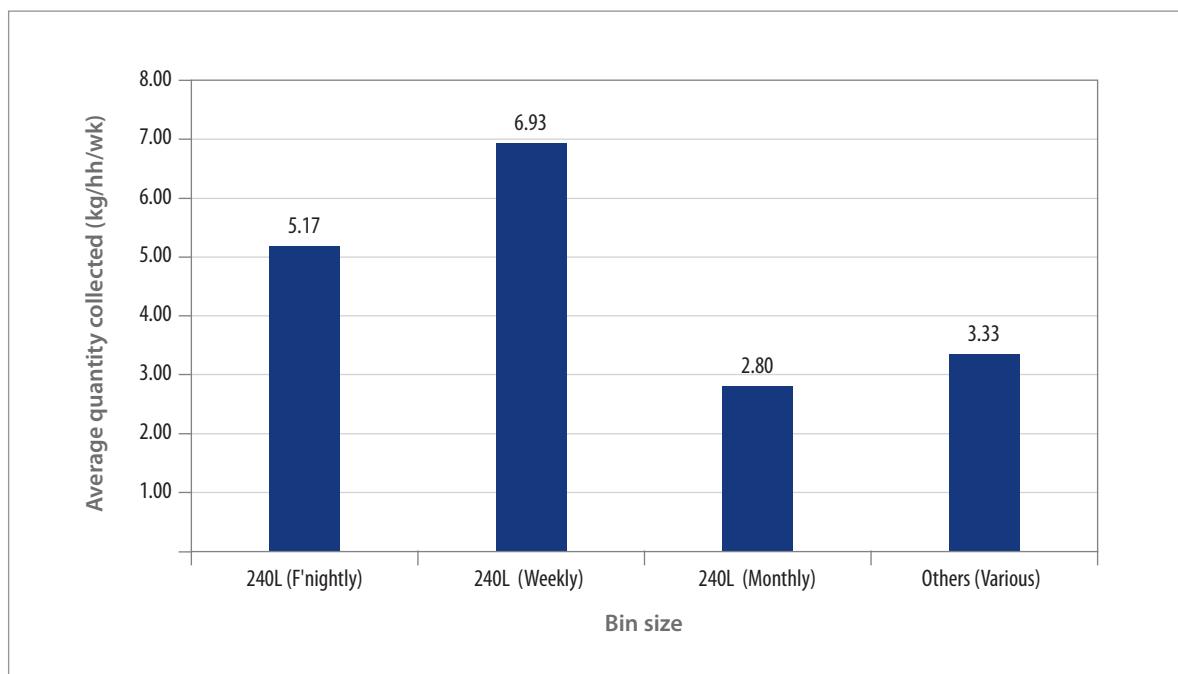

Collection system	SMA	ERA	RRA	Rest of the state	No. of councils	Household collections	
						kg/hh/yr	kg/hh/wk
240L MGB (Fortnightly)	22	5	7	7	41	268.97	5.17
240L MGB (Weekly)	4	–	5	–	9 **	360.51	6.93
240L MGB (Monthly)	2	–	–	3	5	145.66	2.80
Others (Various)*	5	–	–	–	5	173.40	3.33
No Service	5	7	8	68	88	–	–

\* Combination of Tied and Bundled + Crate+ MGBs, or mix of MGBs, or crates + MGBs. Frequency (Various).

\*\* The collected quantity from one council is also included in AWT figure.

Figure 9 below compares the average weekly quantity collected of household garden organics by collection system type. The 41 councils who used the fortnightly 240L MGB collection system were geographically spread across the SMA, ERA, RRA and the rest of the State and collectively serviced over 1.6 million households.

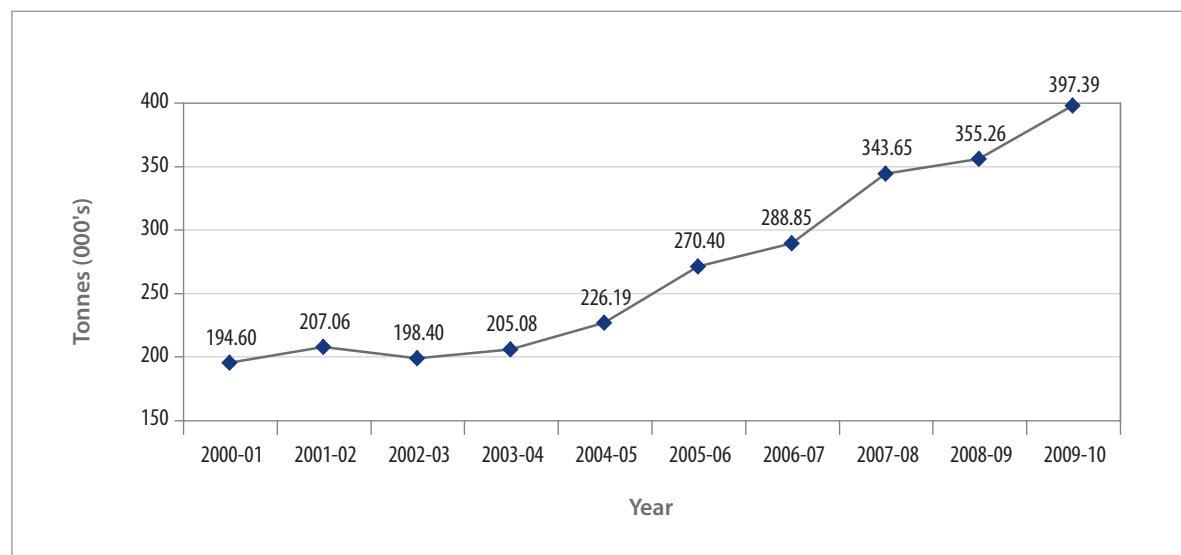

**Figure 9: Average reported weekly kerbside garden organics collected, by collection system**

Garden organics collected at the kerbside around NSW increased by 202,794 tonnes, or 104.21%, compared to 2000–01 data, to a total of 397,390 tonnes in 2009–10:

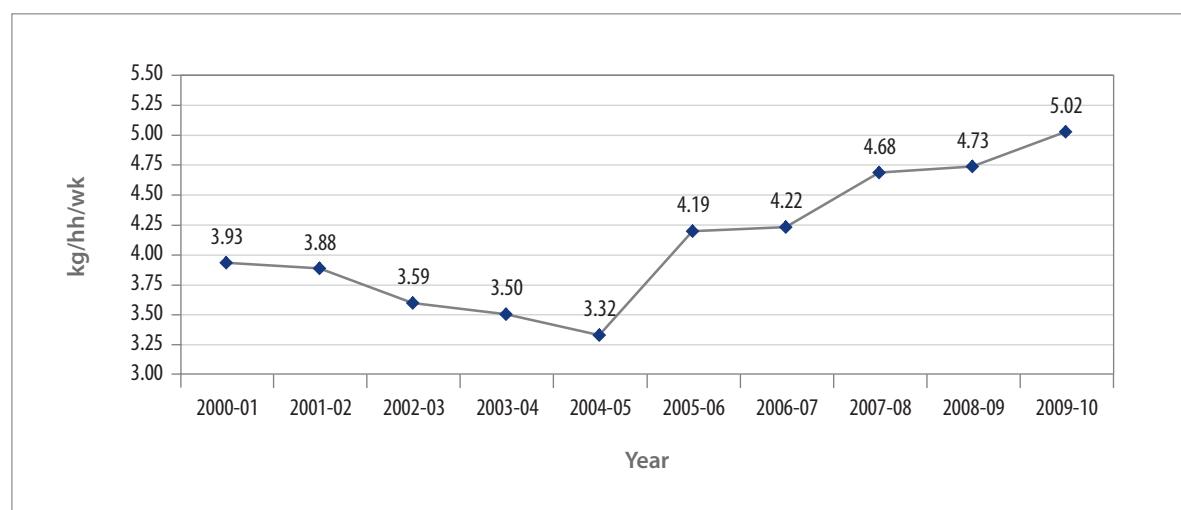

- 258,908 tonnes from the SMA
- 70,326 tonnes from the ERA
- 48,517 tonnes from the RRA
- 19,639 tonnes from the rest of the State.

**Figure 10: Reported annual kerbside garden organics collected in NSW**

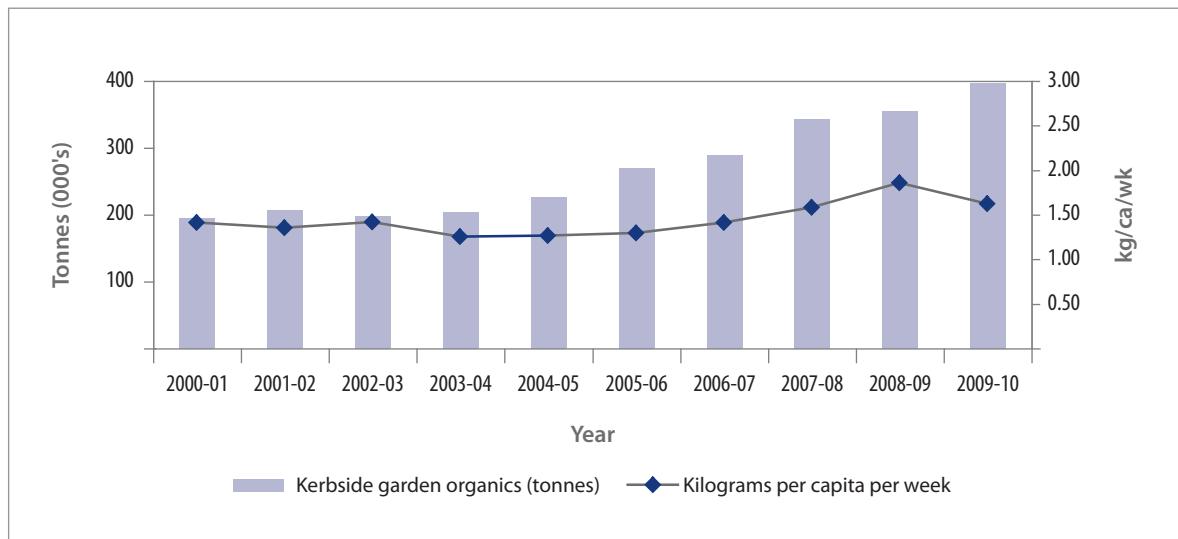

The average weekly collected quantity of household garden organics per household has increased since 2004–05 to an average 5.02 kg per household per week in 2009–10 (Figure 11).

**Figure 11: Reported average kerbside garden organics collected per week in NSW**

The overall increase in garden organics collected in NSW may be explained by the continued increase in the number of councils offering a kerbside garden organics collection service in recent years. The average weekly collected quantity of garden organics per capita has increased from 2004–05 to 1.62 kg in 2009–10 (Figure 12).

**Figure 12: Reported annual and average weekly per capita collection of kerbside garden organics in NSW**

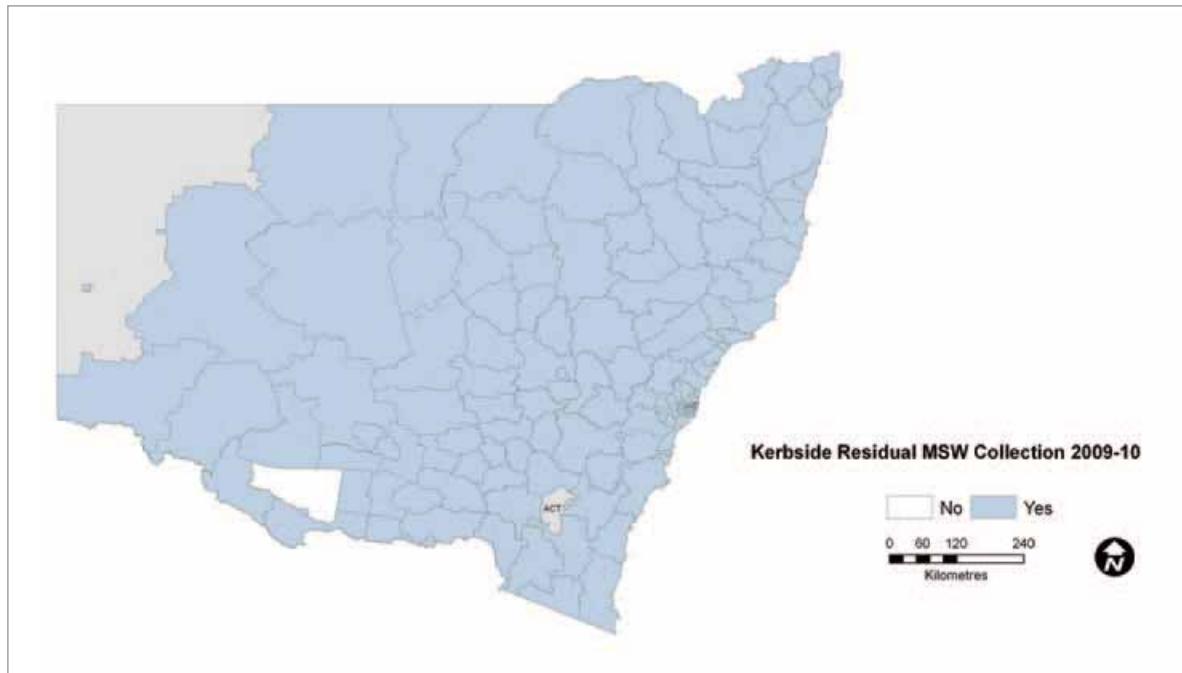

## 2. Kerbside residual waste collection for landfill or AWT

In 2009–10, 151 councils provided kerbside residual waste collection service, reaching 96% of households within councils providing service and 96% of all households in NSW. Access to collection varied across NSW; with 99% of households receiving collection services in the SMA and ERA, 94% of households in RRA and almost 86% in the rest of the State.

**Table 9: Percentage coverage of household and population with a residual waste service in NSW**

Region	No. of councils providing service	Household		
		Total <sup>21</sup>	Coverage percentage % <sup>22</sup> (NSW/Region with service)	Coverage percentage % <sup>23</sup> (NSW/Region)
<b>NSW</b>	151	2,602,230	96.32%	96.30%
<b>SMA</b>	38	1,449,473	98.89%	98.89%
<b>ERA</b>	13	518,677	98.53%	98.53%
<b>RRA</b>	21	290,829	94.16%	94.16%
<b>Rest of the state</b>	79	343,251	85.72%	85.55%

**Figure 13: NSW councils providing kerbside residual waste collection services**

21 Represents households within those councils offering a kerbside residual waste service

22 Coverage percentage of all households within NSW/Region offering a kerbside waste service

23 Coverage percentage of households within NSW/Region with an actual service

An average of 631 kg of residual waste was collected per household from the 150 councils in 2009–10 that provided data, averaging 12.13 kg per household per week and 4.43 kg per person per week.

**Table 10: Average reported annual quantity of kerbside residual waste collected by household and population**

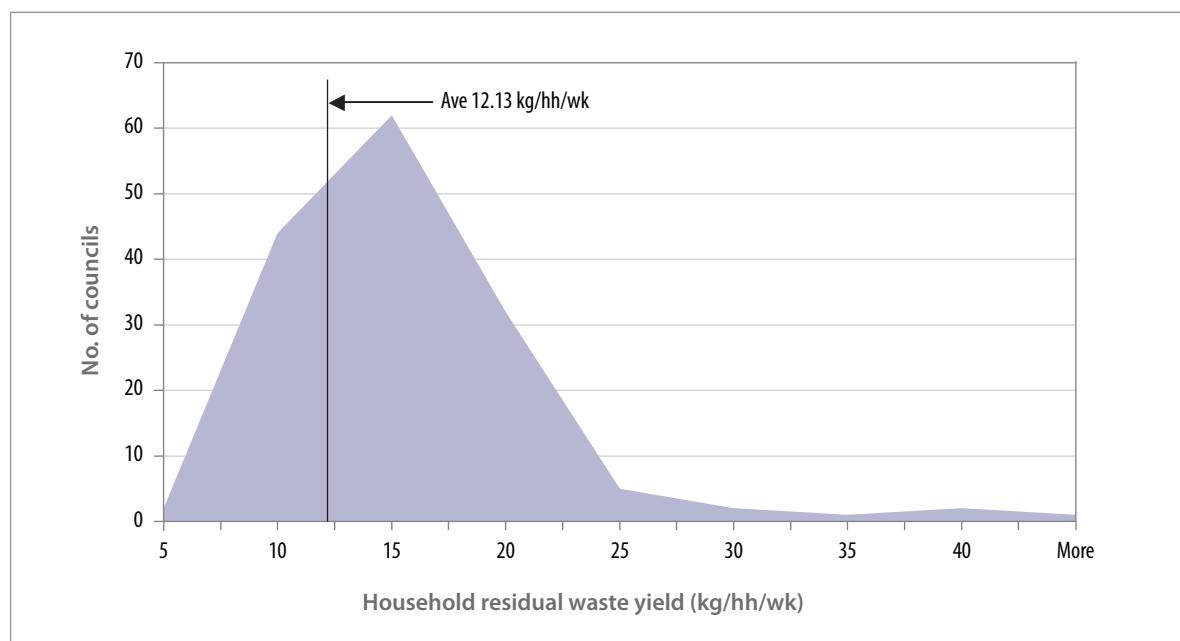

Region	No. of councils reporting	Household <sup>24</sup>		Population <sup>25</sup>	
		Annual kg/hh/yr	Weekly kg/hh/wk	Annual kg/ca/yr	Weekly kg/ca/wk
<b>NSW</b>	150 *	630.89	12.13	230.10	4.43
<b>SMA</b>	38	622.91	11.98	225.51	4.34
<b>ERA</b>	13	653.80	12.57	250.91	4.83
<b>RRA</b>	21	597.79	11.50	224.12	4.31
<b>Rest of the State</b>	100	658.11	12.66	225.04	4.33

\* Represents reporting councils only.

Quantity range of residual waste collected per household per week by the councils is categorised as:

- Between 10 and 15 kg – 62 councils
- Between 5 and 10 kg – 44 councils
- More than 15 kg – 43 councils
- Less than 5 kg – 2 councils
- Non reporting – 1 council

**Figure 14: Average reported kerbside residual waste collected per household across local government areas**

24 Based on total number of households within reporting councils

25 Based on total population within reporting councils

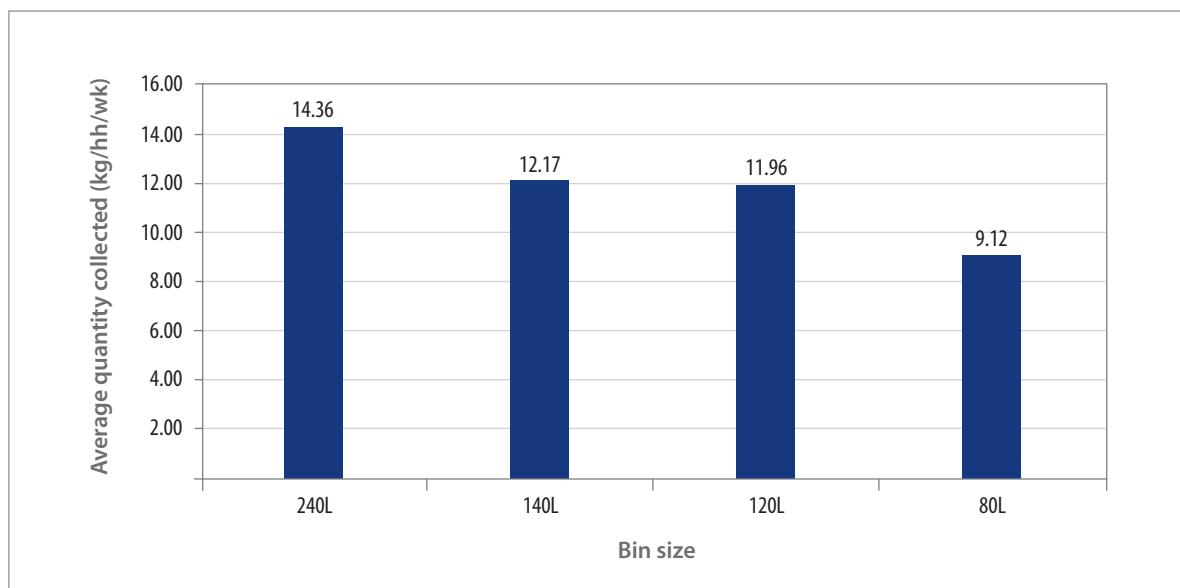

Four different residual waste collection systems were used by NSW councils (Table 11). 75 councils used a 240L MGB system and 75 councils adopted OEH preferred resource recovery practices for residual waste collection (80L MGB, 120L MGB, or 140L MGB).

**Table 11: Average reported annual quantity of kerbside residual waste collected, by collection system<sup>26</sup>**

Collection system	SMA	ERA	RRA	Rest of the State	No. of councils	Household collections	
						kg/hh/yr	kg/hh/wk
240L MGB	8	7	12	48	75	746.48	14.36
140L MGB	12	2	6	17	37	632.91	12.17
120L MGB	14	3	3	12	32	621.93	11.96
80L MGB	4	1	–	1	6	474.36	9.12
No service	–	–	–	1	1	–	–

Figure 15 compares average weekly household residual waste collected by collection system type. One of the preferred collection systems (80L MGB) showed lowest annual average collection of 9.12 kg/hh/wk but only six councils use the system type. The other two preferred collection types 120L and 140L MGBs were adopted by 46% (69 councils in total) of the councils with kerbside residual waste service averaging annual collection quantity at 11.96 kg/hh/wk and 12.17 kg/hh/wk respectively.

**Figure 15: Average weekly quantity collected of household residual waste, by collection system**

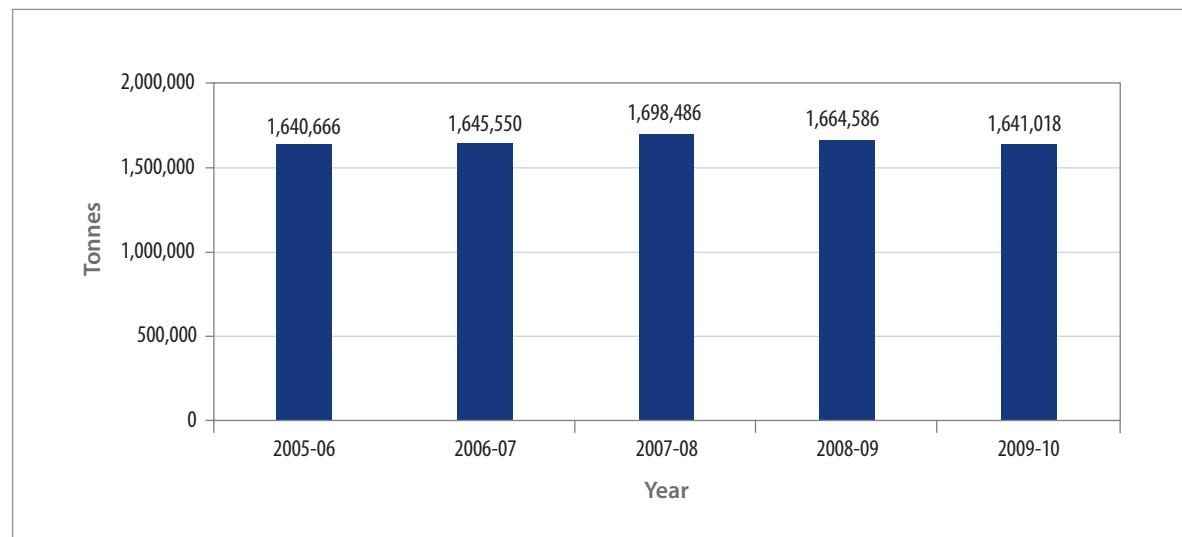

26 The average annual figure is based on predominant bin size and larger proportion of dwelling types within councils. Also excludes non reporting councils for the period.

In 2009–10, total quantity of residual waste collected at the kerbside in NSW was 1,641,018 tonnes:

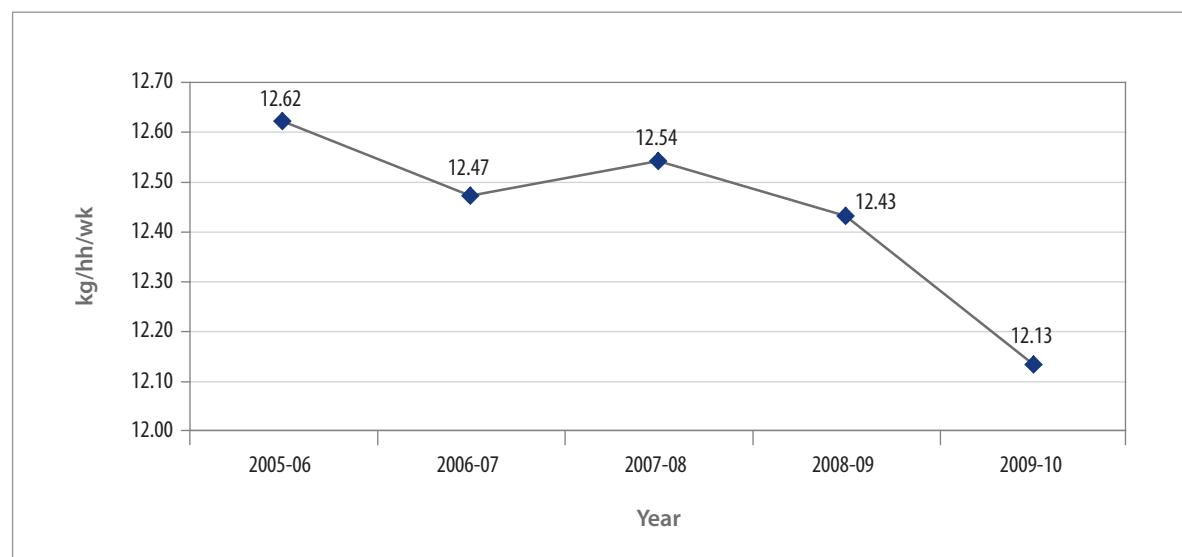

- 902,895 tonnes from the SMA
- 339,111 tonnes from the ERA
- 173,856 tonnes from the RRA
- 225,156 tonnes from the rest of the State

**Figure 16: Reported annual kerbside residual waste collected in NSW**

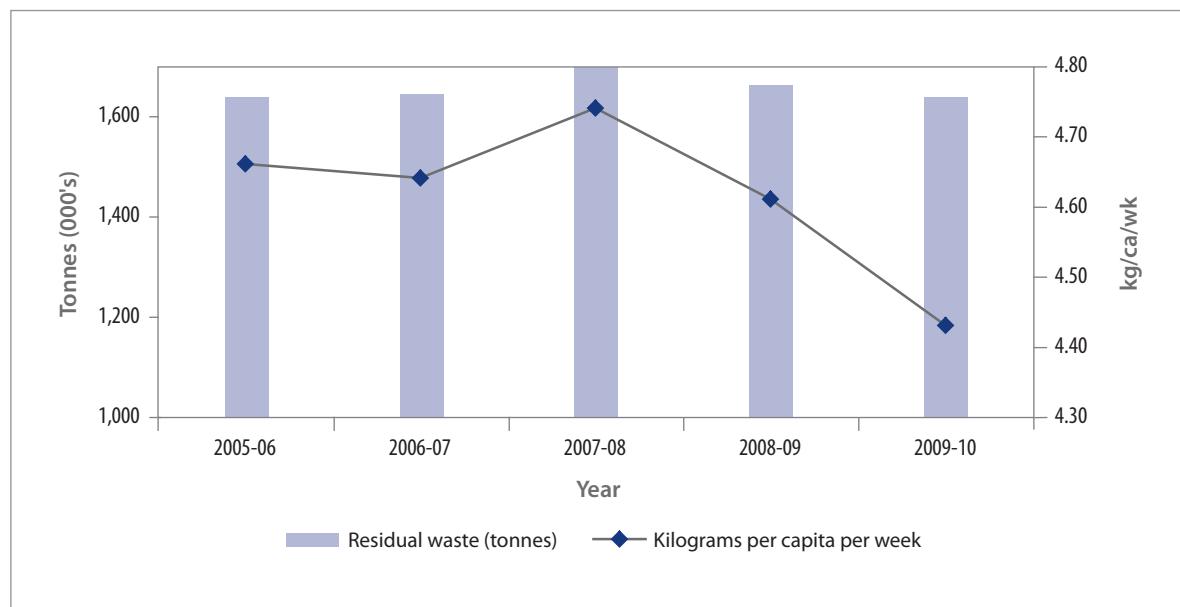

There has been a decrease of more than 57,000 tonnes of kerbside residual waste collected in 2009–10 compared to 2007–08, but a slight overall increment of 352 tonnes has been reported in NSW compared to 2005–06 figures.

**Figure 17: Reported average kerbside residual waste collected per week in NSW**

However, the average weekly collection of household residual waste has decreased by 0.49 kg/hh/wk since 2005–06 to 12.13 kg/hh/wk in 2009–10.

**Figure 18: Reported annual and average weekly per capita collection of kerbside residual waste in NSW**

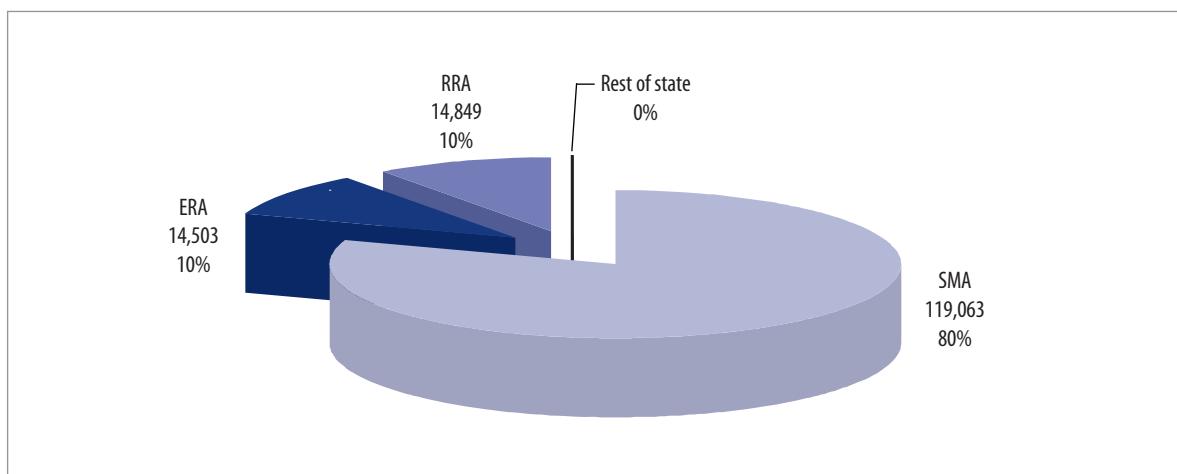

Quantities of residual waste collected have decreased on per capita basis relative to 2005–06 and although a slight increase in 2007–08 has been reported, the per capita basis has decreased from 4.66 kg/capita/wk to 4.43 kg/capita/wk overall.

## **Alternative Waste Treatment (AWT)**

Not all domestic residual waste collected at kerbside goes to landfill; some goes to Alternative Waste Treatment (AWT) facilities. AWT can use a range of different mechanical and biological treatment technologies to treat or process residual waste. Depending on the technology and the operation of the facility, these plants can: recover additional physical and organic resources from residual waste; recover energy from the waste; stabilise waste material prior to landfilling to reduce greenhouse gas emissions and reduce the mass of waste that goes to landfill and thus save on disposal costs. Typically, the ultimate residual wastes from the AWT process and any processed material that cannot be beneficially reused, is disposed of to landfill.

Councils reported that 148,415<sup>27</sup> tonnes of residual waste was recovered using AWT technologies in 2009–10. Of this 80% was in the SMA, 10% each was in the ERA and the RRA and rest of the State did not send any waste to AWT. Note that councils varied in how they reported recovery by an AWT facility as shown in the footnote to Appendix 2.

**Figure 19: Domestic waste recovered by AWT by region**

The total amount of waste processed through an AWT has more than doubled since 2005–06 to 357,065 tonnes and the trend of material reported as recovered through an AWT has increased from 43% in 2005–06 to 48% in 2009–10.

<sup>27</sup> The total excludes 24,620.39 tonnes of organics recovered through an AWT which is reported in kerbside organics collection

### 3. Kerbside Clean up/Hard waste collection

In NSW, 103 councils provided kerbside clean up collections, reaching 91% of all households in NSW (Figure 20). Access to kerbside clean up varied across NSW; with these services provided to 100% of households in the SMA, 95% in the ERA, 82% in the RRA and 59% in the rest of the State.

**Figure 20: NSW councils with a kerbside clean up service**

In 2009–10, 136,600<sup>28</sup> tonnes of material was collected in council clean-ups. 109,028 tonnes went to landfill and 27,572 tonnes were recycled.

The overall Resource Recovery Rate (RRR) for kerbside clean up in NSW was 20%.

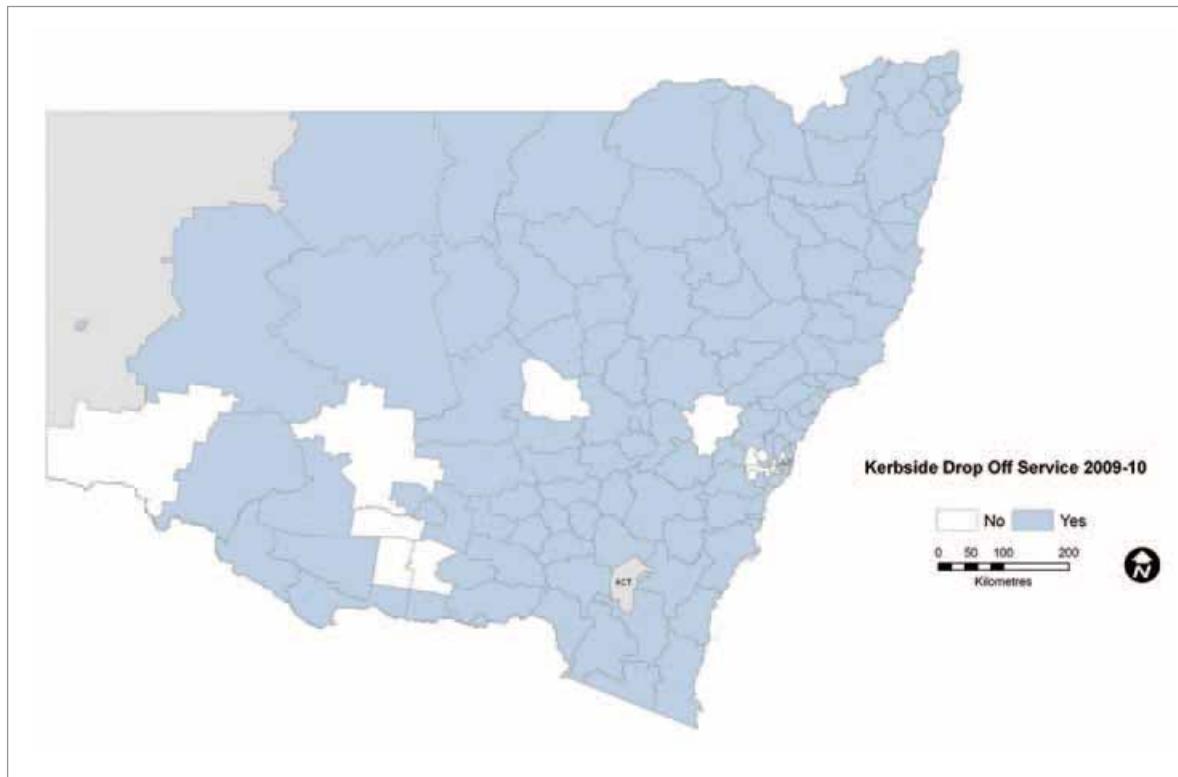

- SMA – 16,170 tonnes recycled and 81,823 tonnes waste to landfill (17% RRR)
- ERA – 7,459 tonnes recycled and 16,458 tonnes waste to landfill (31% RRR)
- RRA – 1,787 tonnes recycled and 6,020 tonnes waste to landfill (23% RRR)
- Rest of the State – 2,146 tonnes recycled and 4,477 tonnes waste to landfill (32% RRR)

28 Represents only 93 councils providing the collected tonnages

## 4. Drop off facilities provided by councils

One hundred and twenty three (123) NSW councils provided a recycling drop off facility (dry recycling and/or garden organics), which was accessible by 71% of all households and 69% of the entire population in NSW (Figure 21). Access to recycling and / or garden organics drop off facilities varied across NSW with access to these facilities at 42% (16 councils) in the SMA, 100% (13 councils) in the ERA, 100% (21 councils) in the RRA and 91% (73 councils) in the rest of the State.

**Figure 21: NSW councils providing a recycling drop off facility**

532,511<sup>29</sup> tonnes of material was collected in NSW, of which 295,303 tonnes were sent to landfill and 237,208 tonnes of recyclable material (58,822 tonnes dry recyclables and 178,386 tonnes garden organics) were collected at drop off facilities. The overall Resource Recovery Rate (RRR) for domestic drop off in NSW was 45%:

- 12,502 tonnes recycled and 6,084 tonnes disposed to landfill in the SMA (67% RRR)
- 74,850 tonnes recycled and 67,490 tonnes disposed to landfill in the ERA (53% RRR)
- 70,411 tonnes recycled and 78,474 tonnes disposed to landfill in the RRA (36% RRR)
- 79,446 tonnes recycled and 143,254 tonnes disposed to landfill in the Rest of the State (47% RRR)

<sup>29</sup> Represents only 121 councils providing the collected tonnages

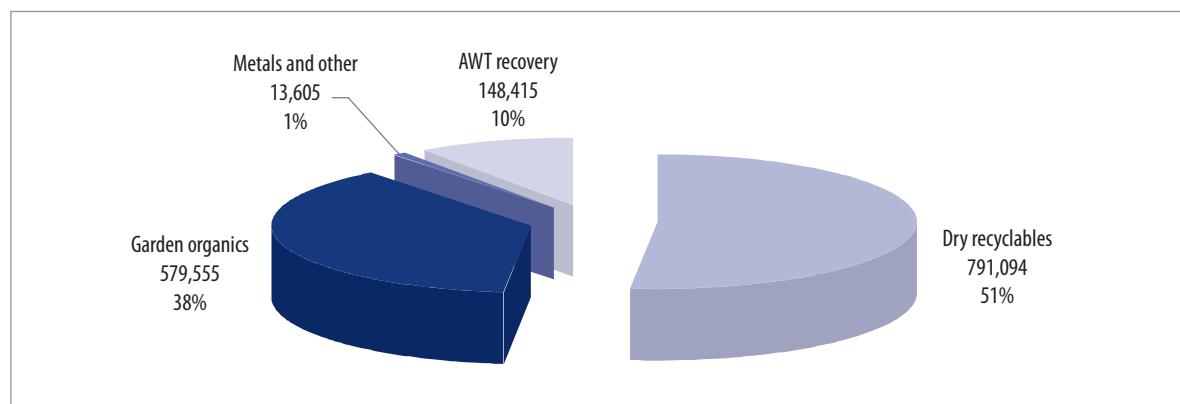

## 5. Domestic Waste Resource Recovery rates

The domestic waste recovery rate for individual councils is reported as the percentage of the total amount of materials disposed of by households that is recovered for recycling or processing. Average waste generation rates per household and per capita have also been developed to compare data at an individual level. When comparing figures from different local government areas, consideration should be given to regional variations in consumption patterns and available services.

This report is based on waste and recycling generated by households only, which is the major component of Municipal Solid Waste (MSW) but is not the total of MSW. The separate biennial WARR Strategy report provides updates on the progress that the NSW community is making towards the waste avoidance and resource recovery targets of the Strategy.

Figure 22 presents total domestic recyclables recovered from different sources. The dry recyclables and garden organics constitute most of the recovered materials with combined total of 89%.

**Figure 22: Reported recovery materials by category**

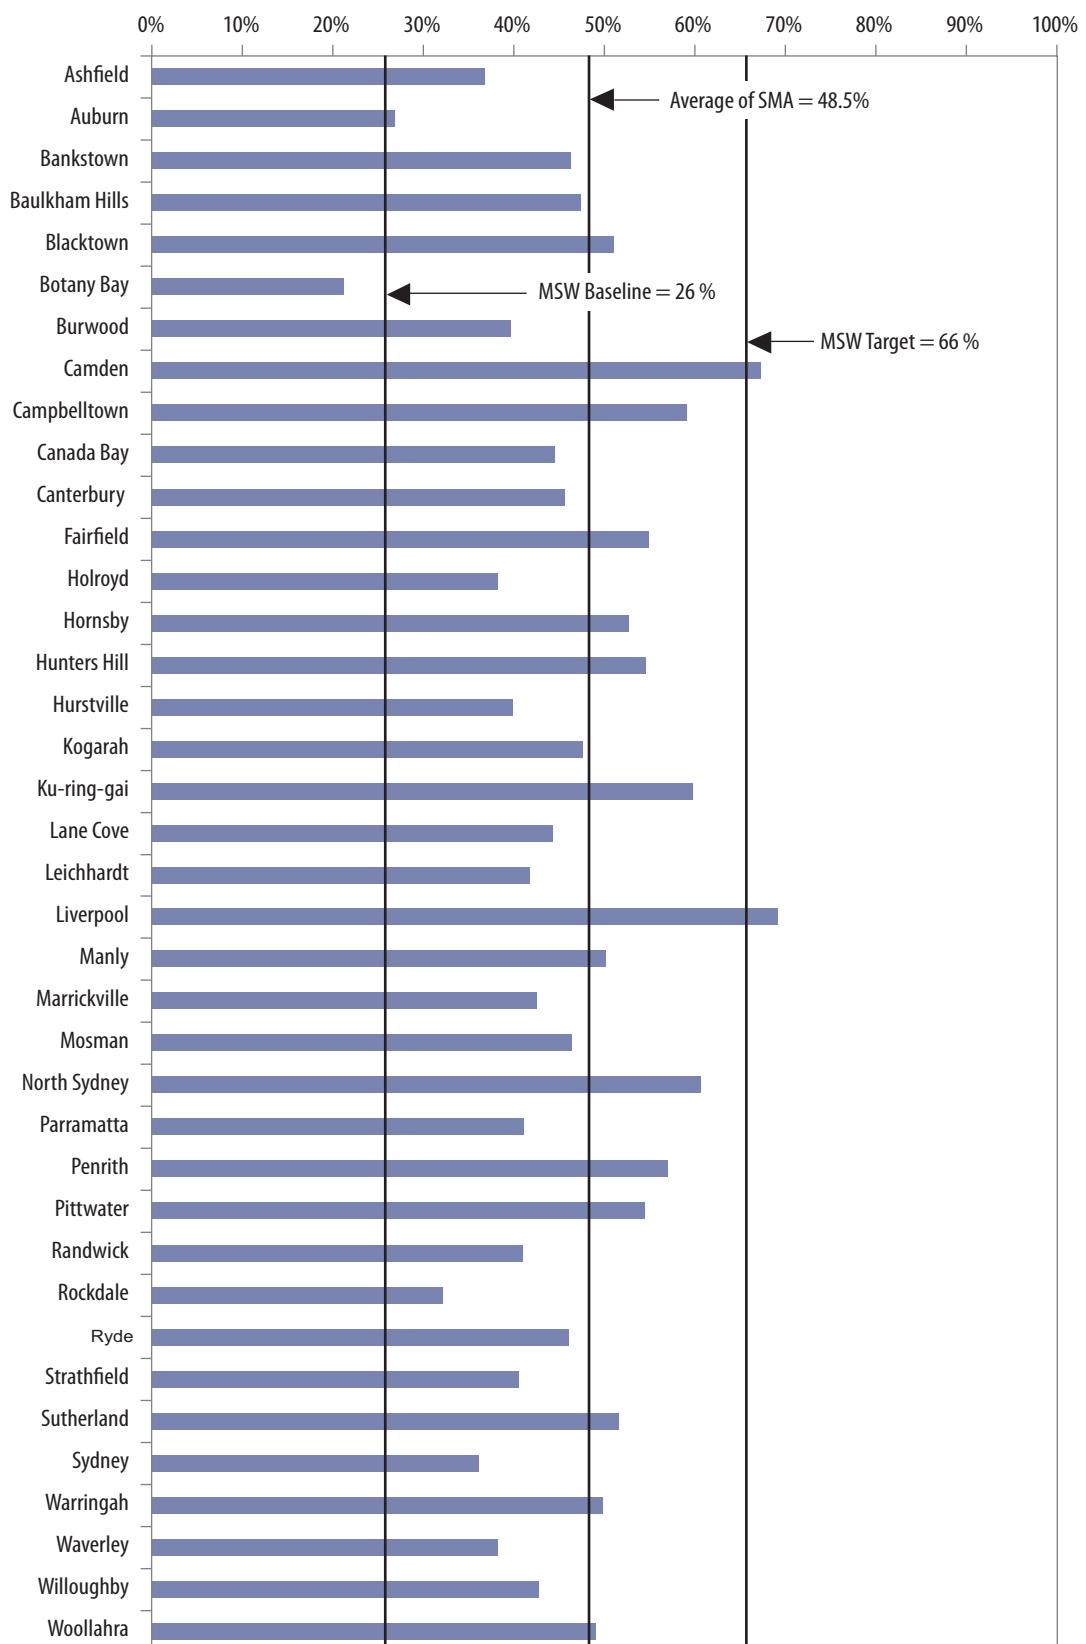

The domestic waste resource recovery rate for NSW in 2009–10 was 45.1% when all collected household waste and recycling is included in the calculation, i.e. residual waste, recycling, garden organics, clean-up and drop-off. The recovery rates for the regions are:

- SMA 48.5%
- ERA 43.3%
- RRA 49.3%
- Rest of the state 32.9%

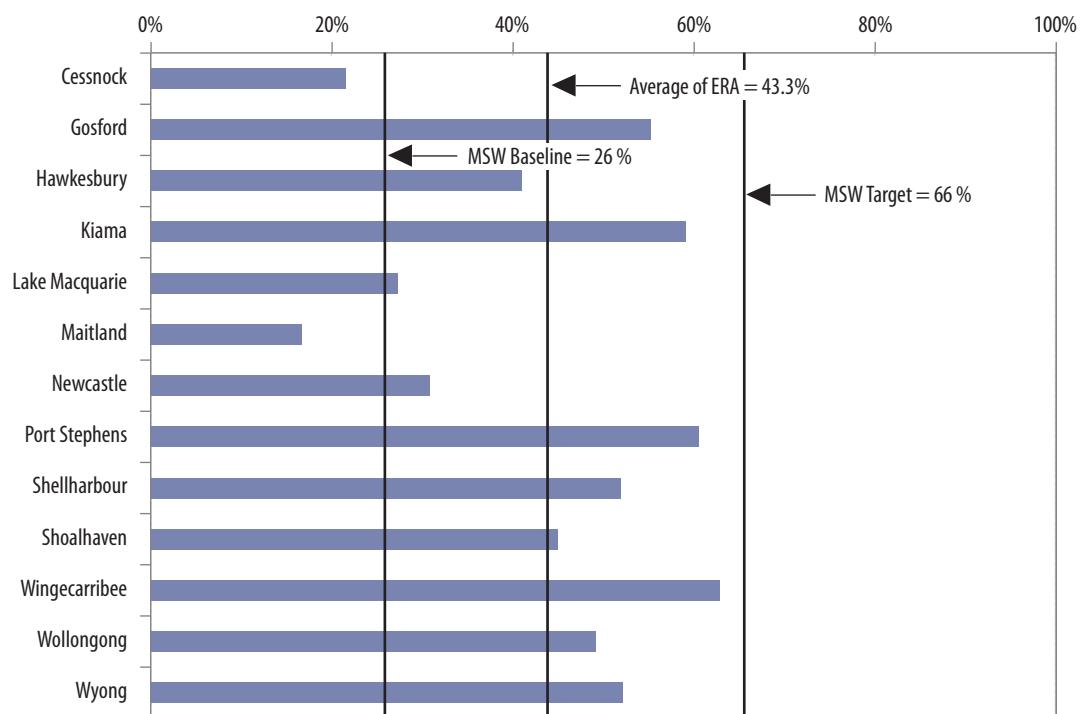

**Table 12: Total domestic resource recovery rate trend**

Domestic recovery rate	2005–06	2006–07	2007–08	2008–09	2009–10
NSW	37.8%	40.8%	43.2%	43.7%	45.1%
SMA	39.2%	42.9%	47.1%	45.3%	48.5%
ERA	40.9%	40.9%	40.0%	43.0%	43.3%
Rest of the state	32.7%	37.2%	38.0%	40.0%	32.9%
RRA	–	–	–	–	49.3%

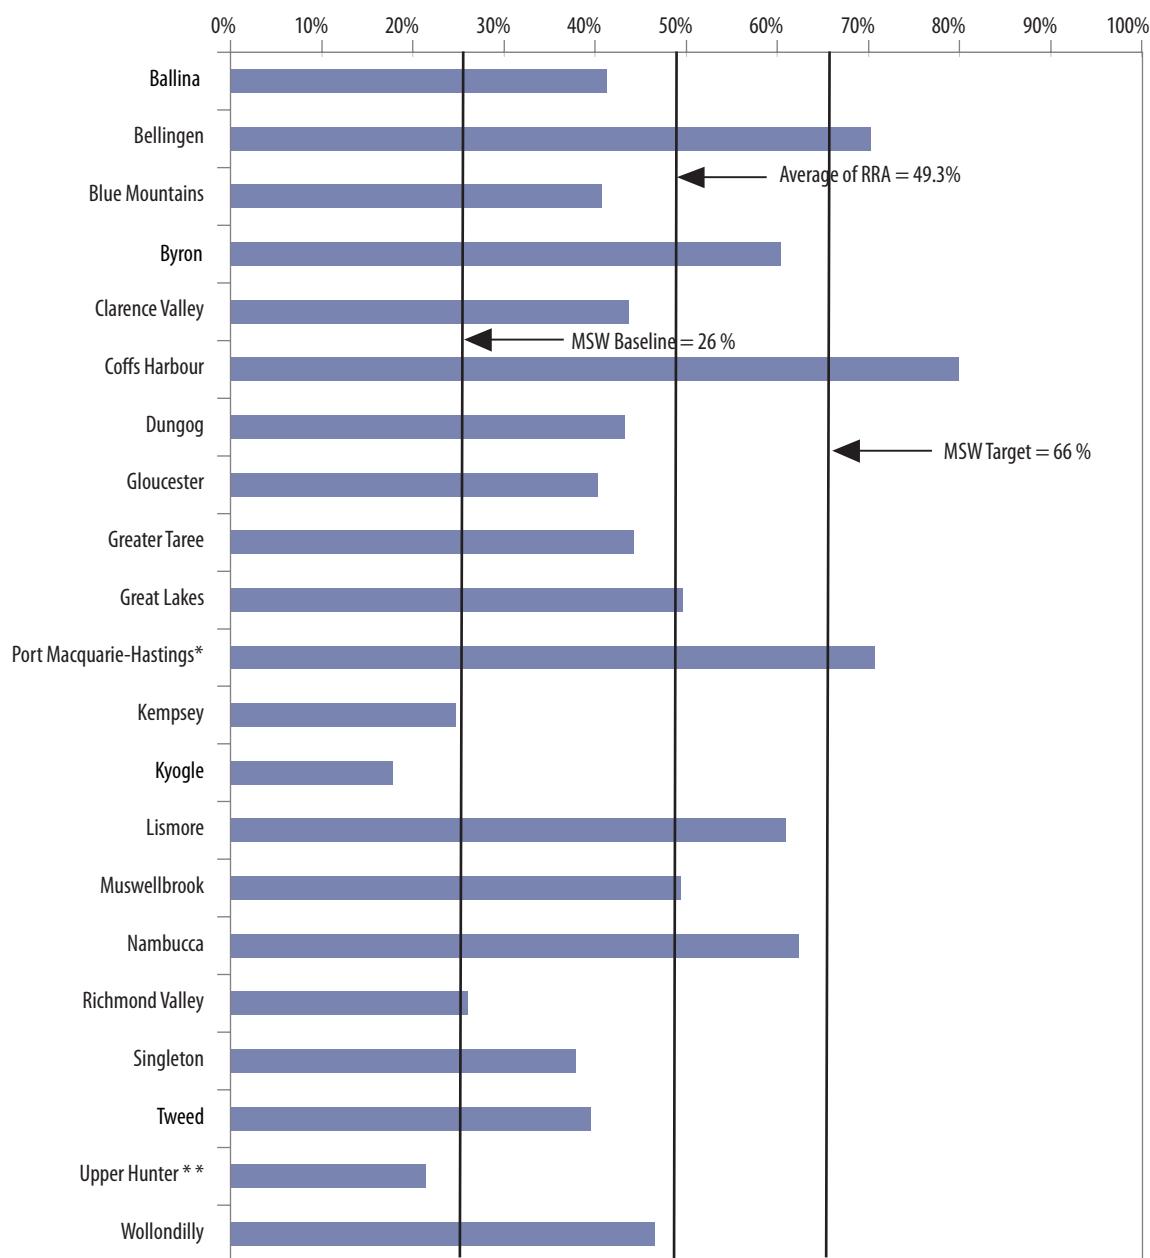

**Figure 23: SMA recovery rate 2009–10**

**Figure 24: ERA recovery rate 2009–10**

**Figure 25: RRA recovery rate 2009–10**

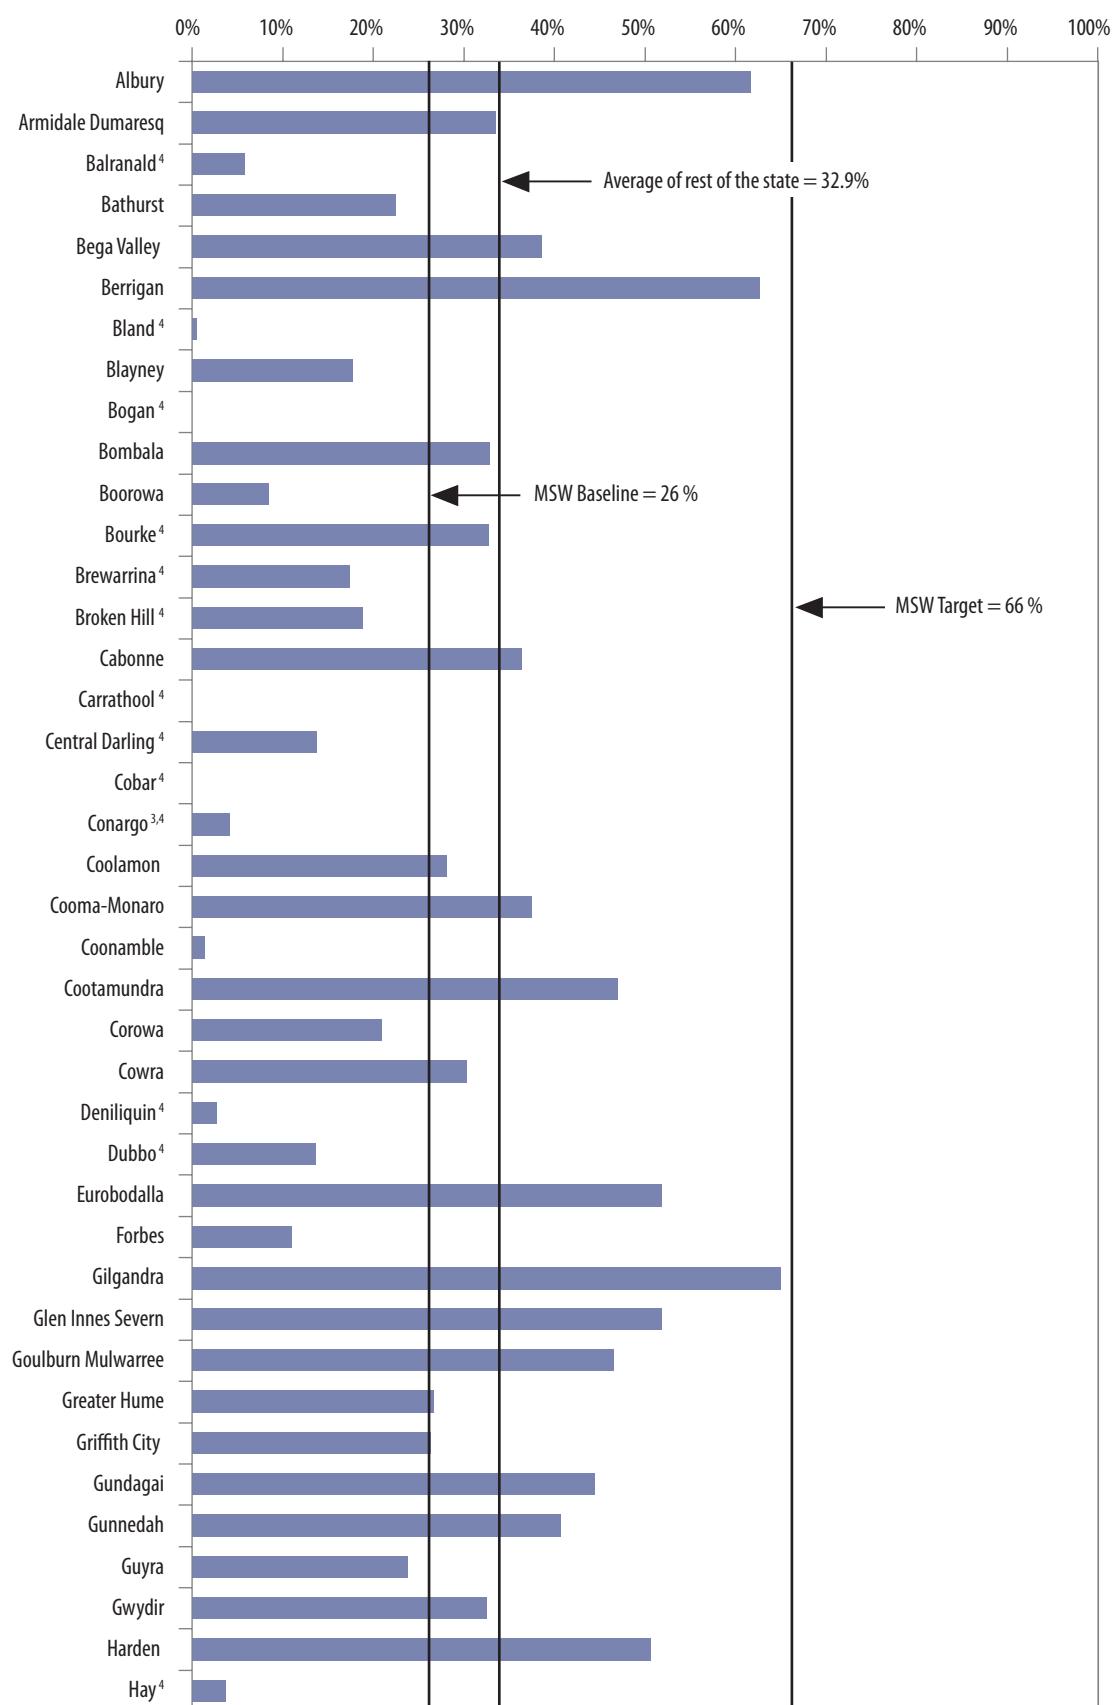

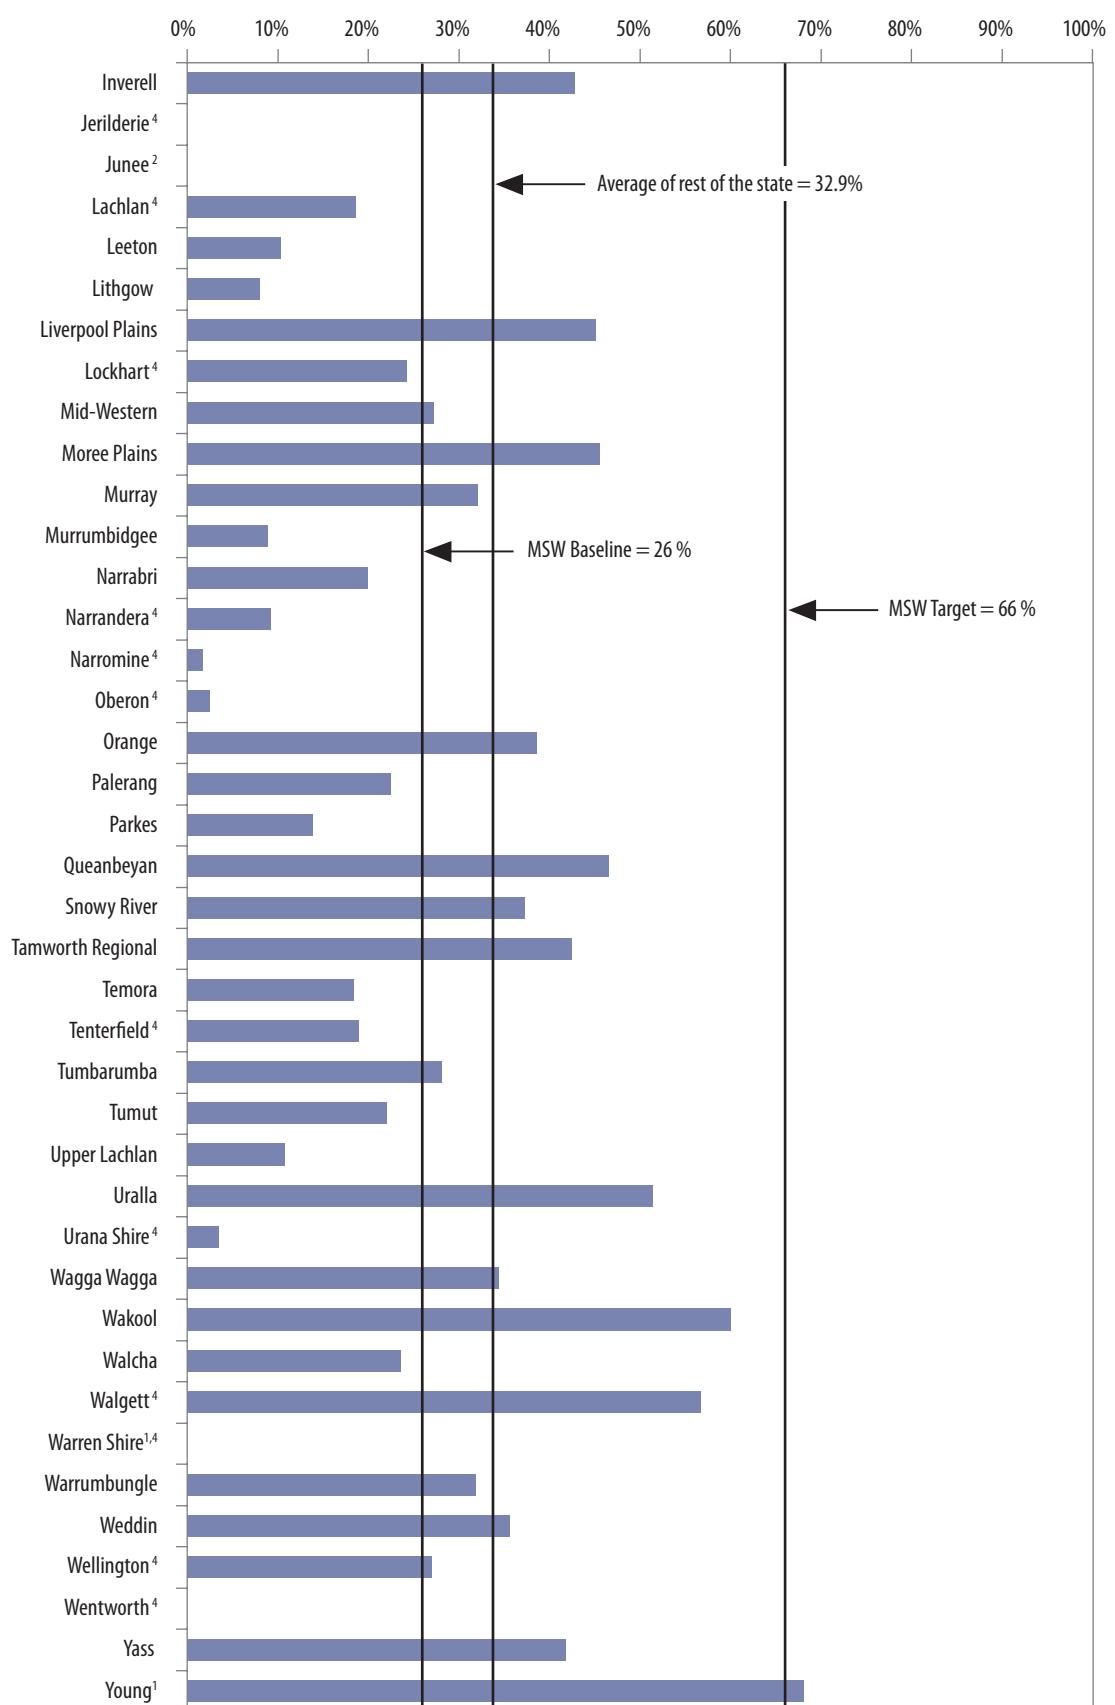

**Note:**

\* Large amount of C & I waste was excluded from the kerbside residual waste quantity

\*\* Substantial year to year variations in self reported disposal and resource recovery data are unexplained and have not been verified

**Figure 26: Rest of the state recovery rate 2009–10**

#### Note:

- 1 No kerbside waste data reported
- 2 No kerbside recycling data reported
- 3 No kerbside waste service
- 4 No kerbside recycling service

## **6. Domestic waste management charges**

For the range of Domestic Waste Management Charges in NSW please refer Appendix 5.

The rate that councils charge each year for the provision domestic waste management services for each parcel of rateable land for which the service is available (s496 the Local Government Act 1993).

The rates are based on council charges provided. There may be various charges for bin sizes and frequency. The figures listed in Appendix 5 are based on the predominant bin size and frequency.

## **Glossary**

### ***AWT technology***

Alternative Waste Treatment technology

### ***Domestic waste generation***

The sum of the total of all materials collected or recovered through the domestic waste collection and resource recovery services (i.e. waste + recycling + garden organics + clean up).

### ***Domestic Waste Management Charge***

The rate that councils charge each year for the provision domestic waste management services for each parcel of rateable land for which the service is available (s496 the Local Government Act 1993).

### ***Drop off recycling***

Places where materials or goods can be lawfully deposited for resource recovery or special management.

### ***Dry recyclables***

The standard range of dry recyclables includes: recyclable paper and cardboard including newspapers, magazines, phone books, cardboard packaging and liquid paperboard; glass bottles and jars; steel cans and aerosols; aluminium rigid and semi-rigid packaging; all plastic containers.

### ***Household***

A household comprises the people that usually reside together within a single housing unit (house, unit, farm etc).

### ***Kerbside Clean up collection***

A kerbside waste collection for waste items that is too large for collection via the normal household waste service.

### ***Kerbside recycling***

A formalised kerbside collection system for recyclables from households, where the householder segregates the wastes according to material type and places them in containers on the kerbside for separate collection.

## **LGA**

Local Government Area

## **MGB**

Mobile Garbage Bin. Also in the general context refers to mobile bins used for the collection of recycling and garden organics.

## **OEH**

Office of Environment and Heritage

## **Organics**

Compostable organics is a generic term for all organic materials that are appropriate for collection and use as feedstocks for composting or in related biological treatment systems (Ex: anaerobic digestion). Compostable organics is defined by its material components: residual food organics, garden organics, wood and timber, biosolids and agricultural organics.

Garden organics include:

- Putrescible garden organic material (grass clippings)
- Non-woody garden organic material
- Woody garden organic material
- Trees and limbs
- Stumps and rootballs (not usually accepted in kerbside collection systems).

Garden organics is one of the primary components of the compostable organics stream.

## **Predominant bin type**

Where a council offers residents a range of bin sizes for a particular waste stream, the size used by the greatest number of households in a given LGA is considered the predominant bin type.

## **Predominant service type**

Where a council offers residents a range of waste service types, the waste service provided to the greatest number of households is considered to be the predominant service type.

## **Recovery Rate**

The Recovery Rate is the proportion of domestic dry recyclables and organics recovered through kerbside and drop off resource recovery services compared to total domestic waste generation.

## **Residual waste**

Residual waste or garbage is materials that are not separated for recycling or recovery, but are generally disposed of at solid and inert waste landfills.

### ***Waste Avoidance and Resource Recovery (WARR) Act 2001***

An Act to promote waste avoidance and resource recovery. Its purpose is to develop a state-wide framework to achieve integrated waste and resource management planning, programs and service delivery, to provide for the continual reduction in waste generation, to minimise the consumption of natural resources and final disposal of waste and to encourage the most efficient use of resources.

### ***Waste Avoidance and Resource Recovery Strategy (WARR Strategy) 2003***

The development of the WARR Strategy is a requirement of the WARR Act. The initial Strategy was released in 2003 and an updated in 2007. The WARR Strategy provides guidance and priorities for action to ensure that efficient resource use and impacts on the environment are considered throughout the life cycle of goods and materials, including the extraction of raw materials, manufacturing, distribution, consumption and recovery for reprocessing or safe disposal.

## Appendix 2: Total domestic and kerbside resource recovery rate 2009–10 (continued)

### *Councils processing through AWT*

ABS	Council name	Region	DLG Group	
<b>AMENDED</b>				
600	Bellingen Shire Council	R	11	Council assumed 49.7% of waste sent to AWT was recovered
1800	Camden Council	S	6	Council assumed 49.7% of waste sent to AWT was recovered
2850	Coffs Harbour City Council	R	4	Council assumed 46.8% of waste sent to AWT was recovered
5700	Fairfield City Council	S	3	Council assumed 49.7% of waste sent to AWT was recovered
6350	Holroyd City Council	S	3	Council assumed 55.0% of waste sent to AWT was recovered

**Note:** For councils using AWT as recovery rates for material sent to AWT are shown.

These rates are as nominally reported by councils and nominally reduced by OEH after discussion with the councils.

They are not verified.

ABS	Council name	Region	DLG Group	
<b>REPORTED</b>				
750	Blacktown	S	3	Council assumed 46.8% of waste sent to AWT was recovered
1450	Camden	S	6	Council assumed 35.0% of waste sent to AWT was recovered
1500	Campbelltown City	S	7	Council assumed 33.0% of waste sent to AWT was recovered
3750	Port Macquarie-Hastings	R	4	Council assumed 11.6% of waste sent to AWT was recovered
3950	Holroyd City	S	3	Council assumed 52.0% of waste sent to AWT was recovered
4100	Hunters Hill	S	2	Council assumed 44.4% of waste sent to AWT was recovered
4900	Liverpool City	S	7	Council assumed 48.7% of waste sent to AWT was recovered
5950	North Sydney	S	2	Council assumed 34.0% of waste sent to AWT was recovered
6400	Port Stephens	E	4	Council assumed 50.3% of waste sent to AWT was recovered
7210	Sydney City	S	1	Council assumed 64.0% of waste sent to AWT was recovered
8250	Willoughby City	S	2	Council assumed 47.2% of waste sent to AWT was recovered
8350	Wingecarribee	E	4	Council assumed 60.0% of waste sent to AWT was recovered
8400	Wollondilly	R	6	Council assumed 17.6% of waste sent to AWT was recovered

**Note:** For councils using AWT as recovery rates for material sent to AWT are shown.

These rates are as nominally reported by councils, they are not verified.
