	[REDACTED]
Q 12: Email:	
	[REDACTED]
Q 13: Please add your comments here:	
	<p>Dear Sir/Madame,</p> <p>I would like to make a submission regarding the load based licensing scheme.</p> <p>I strongly believe in a polluter pays system and I urge the EPA to strengthen this scheme, particularly in regards to coal mines, loaders and transport.</p> <p>The penalties for failing to reduce pollution must far outweigh the costs for implementing improved practices, otherwise there will be no economic incentive for industry to reduce pollution.</p> <p>I understand that coal mines currently have no assessable pollutants listed.</p> <p>I ask that this is urgently updated so that the following are listed: PM 10 and PM 2.5 particles arsenic selenium Chromium III VOCs PAHs NOX lead</p> <p>I would also like to see the addition of aluminum, cobalt and nickel added to the assessable pollutants list. I would also like to see carbon dioxide and methane added to the list for significant polluters.</p>

Thank you for consulting with the community on this important issue.

Sincerely,
Charlotte McCabe
