Q1. First name	Faye	
Q2. Last name	Richardson	
Q3. Phone		
Q4. Mobile		
Q5. Email		
Q6. Postcode		
Q7. Country	Australia	
Q8. Stakeholder type	Individual	
Q9. Stakeholder type - Other not answered		
Q10. Stakeholder type - Staff		
not answered		
Q11. Organisation name	not answered	
Q12. What is your preferred method of contact?	Email	
Q13. Would you like to receive further information and updates on IFOA and forestry matters?	Yes	
Q14. Can the EPA make your submission public?	Yes	
Q15. Have you previously engaged with the EPA on forestry issues?	No	
Q16. What parts of the draft Coastal IFOA are most important to you? Why?		
The lessening of logging restrictions are crazy. The forest is already being over logged		

The lessening of logging restrictions are crazy. The forest is already being over logged.

Q17. What parts of the draft Coastal IFOA do you think have a positive outcome on the management of environmental values or the production of sustainable timber? Why?

None.

Q18. What parts of the draft Coastal IFOA do you think have a negative outcome on the management of environmental values or the production of sustainable timber? Why?

More logging, less diversity, flora and fawna. The sustainable timber you talk of, is it all for pulp? Leave our native forests alone and use plantation timber, not native timber.

Q19. What are your views on the effectiveness of the combination of permanent environmental protections at the regional, landscape and operational scales (multi-scale protection)?

What is permanent?! The previous restrictions were not. You are giving away our forests to multi-nationals like Boral. Local timber mills cannot get logs, but Boral never runs out of stock.

Q20. In your opinion, would the draft Coastal IFOA be effective in managing environmental values and a sustainable timber industry? Why?

No. You are giving more ways to strip the forests. The snigging of logs up cliffs is one example.

Q21. General comments

I have lived next to Forests NSW for 34 years. In that time it has been "harvested" 4 times. And I'm sure, always within the current guidelines. I used to hear 3 different types of owls every night. Now I may hear an owl once a week! Dah, do you think the overharvesting may have something to do with it? The environmental restrictions should be getting stronger, not weaker. The latest info about locating koalas uses sound recordings when searching for koalas. I doubt this method is used often as it is much more accurate than looking for scratches on trees. No one polices these rules/guidelines anyway.
